SUBJECT: Transfer Application 2598 (Water Right #43-4111)
and the Missing Well Log

Regarding the matter of clay aquicludes which might lessen the influence of a well near the Raft River, a 1970 USGS report on this basin says that for the Raft formation (a principal unconsolidated aquifer underlying and indistinguishable from the alluvium), "Beds of clay are mostly thin but are abundant. Individual beds thicken or thin within short distances and can only rarely be correlated between wells a short distance apart." (P.33)

I believe that the applicant's well, being so close and so shallow, will be, inspite of the applicant's own beliefs, in hydraulic communication with the river. It is obvious that the river has been adversely affected over the years by the steady growth in groundwater use, and it also is obvious, even to the layman, that an ideal location in which to place a well would be as close as possible to the river, where groundwater, at times of low or absent surface flow, would be entrained under the river channel.

From a technical point of view, there seems to be nothing more that can be said on this case.

**NOTICE OF PROPOSED
CHANGE OF WATER RIGHT**

Notice is hereby given that JoDee Willett of Malta, Idaho, has applied to the Department of Water Resources to add a point of diversion of the waters of a groundwater source. The right sought to be changed is evidenced by Claim No. 43-4111, and is recorded as follows:

Amount: 1.60 cfs. Priority: August 1, 1958.
Point of Diversion: SE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 32, T14S, R27E, B.M., Cassia County. The water is used for irrigation purposes of 80 acres from April 1 to November 1 within the SW $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 29, T14S, R27E.

TO BE CHANGED AS FOLLOWS:

Point of Diversion: SE $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 32, T14S, R27E. Place of Use: No change.

The water is used for irrigation of 80 acres from April 1 to November 1.

Any protest against approval of the above proposed change of water right must be filed with the Idaho Department of Water Resources, 1041 Blue Lakes Blvd. North, Twin Falls, Idaho 83301 on or before October 19, 1981.

Re: Claim to a Water Right

Dear Mr. Willett:

Our office is presently processing your claim to a water right you recently filed with our office. In reviewing the claim it appears that the right being claimed was established August 1, 1958 for the irrigation of 80 acres in Sec. 29, T14S, R27E, B.M. from a well in the SE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 32, T14S, R.27E, B.M. It then appears from the claim that the well in the NW $\frac{1}{4}$ SW $\frac{1}{4}$, of Sec. 32 was added as a point of diversion in June of 1977 for the irrigation of these same 80 acres. If this is the case probably what should be done is that the claim should be changed to record the right as it existed in 1958 and then a transfer application be filed for the addition of the additional point of diversion.

Please find enclosed another claim form and an application for transfer.

If you have any questions please feel free to contact this office.

Dear Mr. Tuthill,

In answer to your letter and our recent conversation, I am unable to obtain a log of the well located in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec 32, T. 14 S. R. E 7 E.

The depth of the well is approximately 300 ft. It is about 300 ft from Raft River as are 4 or 5 wells in this same area. Some are closer and some not so close. I don't know the depth of the perforations but I am certain the well does not take any water from the river as there is no fluctuation in the amount of water that it pumps. The river comes from the snow melt and the rainfall in the hills south of us. The amount of water in the river depends on the amount of snow. Some years

MICROFILMED

it has a lot of water and of course some years it doesn't. It usually floods in the spring then in the summer there is only a foot or two of water in it. The ground here is heavy clay and I don't believe the water from the river could get down far enough to the normal water table to ever be pumped out. I have never heard anyone who takes water from the river suggest that this has happened.

Yours truly,
Mrs Jodee Skellett

RE: Application For Transfer No. 2598 on Water Right 43-4111

Dear Mrs. Willett:

This office is currently reviewing the above-referenced Application For Transfer. We find that we need information on two items before we can proceed with processing the application.

First, we need a log of the well located in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 32, T. 14 S., R. 27 E. Second we need information regarding the normal flows in the Raft River near the well. Is the river generally flowing? Who diverts the water? What is a typical flow.

Please provide this information to my attention prior to September 15, 1982, to expedite our continued processing of the application.

Sincerely,

DAVID R. TUTHILL, JR., P. E.

MEMO

TO: Dave Tuthill *DRT*
THRU: Murland Packer and Wayne Haas *WHA*
FROM: Alan Robertson *R*
SUBJECT: Transfer application #43-4111 for a new well in
T14S R27E Section 32 NW1/4SW1/4, Cassia County

See letter dated Sep 10 → The applicant apparently intends to split his groundwater right for 1.6 cfs between an original well and the new well. Assuming there are no clay aquicludes, calculations show that roughly 95% of the total volume of groundwater pumped from the new well would be derived from the Raft River if it is 100 feet from the river as it appears to be on the sketch map. About 28% of the diversion from the original well would be derived from the river. Unfortunately, we do not have a log of the new well or logs for other wells near enough to conclusively determine whether casing and sealing would be effective.

The 1975 Cassia County irrigated land map shows there are surface water users downstream from these wells. These irrigators also use groundwater and may rely on it when the river flow is absent or minimal. River flow data about ten miles upstream indicates that, after June, flows are generally less than 10 cfs. The river may be dry near the wells during much of the irrigation season.

We recommend attempting to secure the log of the well before approving this transfer. If a clay layer is present, casing and sealing should minimize or eliminate the effect of being so close to the river.

Please review the new point of diversion, within the NW $\frac{1}{4}$ SW $\frac{1}{4}$ S32.
Will it have significantly more effect on the Raft River than
the original p.d. in the SE $\frac{1}{4}$ NW $\frac{1}{4}$?

MEMORANDUM

To: File #43-4111 Transfer by JoDee Willett
From: Allen Merritt

Subject: Field Examination of Claimed Water Right

On March 1, 1982 I met with the son of JoDee Willett (LeVon Willett) and we examined the lands covered under Claim #43-4111. These lands consist of 80 acres within the SW $\frac{1}{4}$ NE $\frac{1}{4}$ and NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 29, T14S, R27E, B.M. All of these lands are presently being irrigated. The attached aerial photo obtained from the Cassia County ASCS Office which was taken in 1978 shows that these lands were irrigated at that time also. At present the lands are being irrigated from the two wells which the transfer attempts to record. The present sprinkler system on these lands consists of two $\frac{1}{4}$ mile handlines and two $\frac{1}{4}$ mile wheel-lines which take water from the mainline described on the transfer application. LeVon Willett indicated that these sprinkler lines require a little over 60 miner's inches of water. Mr. Willett also pointed out the remnants of the old ditch which delivered water from the well in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Sec. 30, T14S, R27E, B.M.

During my examination I found nothing to dispute what the original claim recorded; however this should not be construed to be a confirmation of the claimed right.

The proposed well is right next to the Raft River.

I would recommend that Hydrology take a look at this one. It may be that the River is usually not flowing in the location of the proposed well.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

NO. 43-4111

Notice is hereby given that JoDee Willett of Malta, Idaho has applied to the Department of Water Resources to add a point of diversion of the waters of a groundwater source. The right sought to be changed is evidenced by Claim No. 43-4111, and is recorded as follows:

Amount: 1.60 cfs

Priority: August 1, 1958

Point of Diversion: SE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 32, T14S, R27E, B.M., Cassia County

The water is used for irrigation purposes of 80 acres from April 1 to November 1 within the SW $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 29, T14S, R27E

TO BE CHANGED AS FOLLOWS:

Point of Diversion: SE $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 32, T14S, R27E

Place of Use: No change

The water is used for irrigation of 80 acres from April 1 to November 1.

Any protest against approval of the above proposed change of water right must be filed with the Idaho Department of Water Resources, 1041 Blue Lakes Blvd North, Twin Falls, Idaho 83301 on or before October 19, 1981.
