Re: Water Permits 98-7654 and 98-7655

Dear Mr. Spackman:

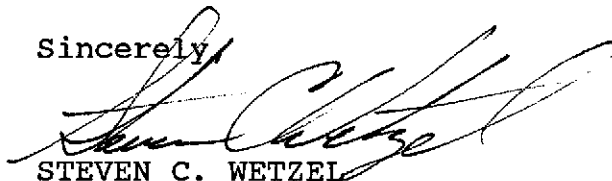

Elk Mountain Farms is in receipt of the above captioned water permits. Our law firm represents Elk Mountain, and we wanted to thank you for your attention to that matter and your assistance in completing the application procedure.

Please advise as to the current status of Water Permit 98-07625. It is my understanding that a water license is due for that file number. I would appreciate any information on the current status of that permit.

Mr. Spackman could you also check the files on these two as well as any other Elk Mountain Farm (Anheuser-Busch) and make sure that our office is copied on future correspondence to Elk Mountain. This would be of great assistance in streamlining further applications. The Idaho file numbers which Elk Mountain has an interest in include 98-07248, 98-07309, 98-07625, 98-07631, 98-07632, 98-07651, 98-07654 and 98-07655.

Thank you for your assistance, and we look forward to working with you in the future.

RE: Applications to Appropriate Water Nos. 98-7654 and 98-7655
Proposing Diversion of 10.5 and 12.1 Cubic Feet Per Second,
Respectively, from the Kootenai River

Dear Sirs:

On August 9, 1989, I wrote a letter asking for additional information about application to appropriate water no. 98-7654. I subsequently received application for permit no. 98-7655 which contains a great deal of information regarding application no. 98-7654.

After having reviewed the information, I find that it is sufficient, and no further information need be submitted. I apologize for the prior request and will attempt to expedite these applications.

RE: Application to Appropriate Water No. 98-7654 Proposing
Diversion of 10.5 Cubic Feet Per Second from the Kootenai
River

Dear Sirs:

I have reviewed application no. 98-7654 to determine whether all of the information required has been submitted, and also to determine whether the application should be approved or rejected.

Rule 4,5. of the Water Appropriation Rules and Regulations requires submittal of detailed information for all applications proposing irrigation of over 200 acres. Application no. 98-7654 falls within the category of large diversions requiring additional information. While the location of the diversion in a less-water-scarce area of the state lessens the possible impact on other users and other possible detrimental effects, the following information should be submitted:

1. A statement of design construction or operation techniques which will be used to reduce impact if any, on existing rights.
2. Project design plans and cost estimates to complete the project.
3. Comments from Boundary County, and the Idaho Department of Health & Welfare, Division of Environment.

Once the above requested information is submitted, the Department will act on your application.

Respectfully,

A handwritten signature in cursive script that reads 'Gary Spackman'.

Dear Mr. Ripatti:

We have received your Joint Application Form. Since the work involves construction of a water diversion structure, a Permit to Alter a Stream Channel is not required from this office.

There may be requirements from the Idaho Department of Lands and the U. S. Army Corps of Engineers so we are forwarding a copy of your application to them.

Regarding Elk Mountain Farm's water right applications, due to an error made in publication in the newspaper and other processing problems, you can expect the approved permits by approximately July 15th.

Dear Bob:

REFERENCE: 98-07654 and 98-07655 ELK MOUNTAIN FARMS WATER
DIVERSIONS FROM KOOTENAI RIVER

We received a letter from the attorneys of Elk Mountain Farms requesting our comments on their water diversions from the Kootenai River. They have already incorporated screening requirements of one quarter inch mesh and approach velocities of 0.5 feet per second or less into their design.

If the diversions will require excavation in the river bed or bank, we would request that the work occur during low flows in late July or August to minimize impacts to fish habitat and water quality. We currently have a research project attempting to identify critical sturgeon spawning and rearing areas in the Kootenai River. These areas are currently undocumented so scheduling instream activities after fry have emerged would minimize impacts. We would also recommend that upland riparian areas that are disturbed by line placement be revegetated prior to fall rains to prevent erosion.

Thank you for the opportunity to comment.

Sincerely,

Dear Applicant:

The Department of Water Resources herewith acknowledges receipt of your application for a permit to appropriate a portion of the public water of the State of Idaho as well as the appropriate filing fee, for which a receipt is enclosed. The appropriation application has been assigned the above-referenced number. To assist us in providing you with accurate, speedy service, please refer to this number in all future correspondence.

Your appropriation application is currently in the process of being advertised in the county newspaper. The advertisement will be published for two weeks followed by a waiting period of ten days to allow for the submittal of protests.

If the appropriation application is protested, you will be sent a copy of the protest. All protests must be resolved before the appropriation application can be approved or denied. If the appropriation application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will then conduct a complete review prior to the final processing of the appropriation application and notify you of the outcome of this review. If the appropriation application is approved, a copy of your appropriation permit (bearing the reference number) will be sent to you.

If your source of water is a well (unless you are using a well that is already in existence), you will also have to apply for a permit to construct the well. These drilling permits can be obtained from this office, but can only be issued to holders of valid ground water rights or approved appropriation permits.
