

MEMORANDUM

Date: April 26, 2007
To: Transfer 73364
From: amerritt
Re: sufficiency memo

Transfer proposes adding a supplemental well to be drilled for a dairy approved under previous transfer 71248 located 7.75 - 8.25 miles south and 6.0 - 6.5 miles east of Murtaugh. Well to be drilled is located approx. 3/8 miles east of two existing wells, located near the southwest corner of the proposed dairy site, will serve as points of diversion for water at the dairy. New pod location is within the new ESPA model boundary within the same cell as the two existing wells. Note that the original application has an apparent typo on the range, the map shows the pod in R21E and that is how the data was entered. On 4/25/07 Brockway Engineering was contacted by phone and it was confirmed that the proposed well is in R21E as the map indicates.

· Authority to File:
Applicant is listed as current owner in IDWR records.

· Water Right Validity:
Right is based on decree (7-5-2005) and created by transfer 71248. Forfeiture does not appear to be an issue.

· Injury to Other Water Rights:
None anticipated. Right to be diverted and used in same general area as currently authorized.

· Enlargement of Use:
None if appropriate conditions and limits are implemented.

· Local Public Interest:
No negative impacts anticipated.

· Beneficial Use/Conservation of Water Resources:
Proposed use is recognized as beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
