Dear Mr. Blumhagen:

We are returning herewith your Proof of Completion of Works in connection with the above permit for the reason it cannot be accepted as a full completion of works under the terms of said permit for the reason that you stated under remarks - " That diversion works have been completed but the pipe line has not been installed".

Your permit states that the kind of works consist of a small storage-box and pipe line. Providing said pipe line is not installed or if you cannot state in the Proof of Completion of Works that the works are fully completed according to the terms of the permit, we cannot accept your Proof of Completion of Works.

If your works were not completed by November 27, 1957, we suggest that you request an extension of time on the form enclosed, and return to this department. We can grant you an extension of one or two years to November 27, 1958 or to November 27, 1957, if necessary, for Completion of Works.

Please return the Proof of Completion of Works corrected, or fill out the form for extension of time and return to this department.

PROOF OF COMPLETION OF WORKS

Mr. D.W. Blumhagen

Boise, Idaho **September 1, 1957**

Dear Sir:-

Under the terms of your permit No. 25280 you are required to complete your diversion works on or before November 27, 1957. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
