Re: R J, L.L.C. Application for Water Right Transfer

Dear Allen:

Please process the enclosed transfer prepared on behalf of R J, LLC. (Richard & Jolynn Young) in cooperation with Young & Young Partnership to transfer and split ownership of 555 acres of ground water irrigation associated with water right 36-8775 and 36-7042 currently appurtenant to the Keco Farm.

The proposed new place of use is already part of the larger permissible place of use for many other water rights (see attached water right list). The place of use for all other rights listed currently appurtenant to the proposed place of use will need to have the indicated property removed from the authorized place of use. An agreement describing the water rights and point of diversion split has been prepared and is attached.

There are several transfers pending on water right 36-8776 which is appurtenant to portions of the property, and the remaining portions involved with those transfers will also need their final place of use and points of diversion altered to reflect this transfer.

If you have any questions don't hesitate to contact me.

Sincerely,

Jason C. Helms, EIT
Brockway Engineering, PLLC
