RE: Application for extension of time to avoid forfeiture of a water right
Water right number 21-12914

Dear Mr. Warner,

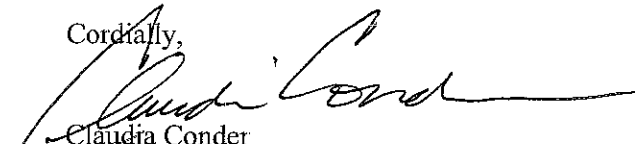

Please find enclosed an application for extension of time as referenced above. Also enclosed is a check in the amount of \$100.00 for the filing fee. As noted, the application requests an extension of time to avoid forfeiture for PacifiCorp's water right associated with its St. Anthony hydroelectric plant, St. Anthony, Idaho.

The Ashton and St. Anthony projects are licensed under FERC license No. 2381. PacifiCorp last operated the St. Anthony plant in June 2002. Since that time, PacifiCorp has conducted several studies to determine the viability of repairing and continued operation of the St. Anthony plant. These studies include feasibility as well as operational constraints and perpetual obligations for use of the water. PacifiCorp was purchased by Mid American Holdings Company (MEHC) in March 2006. This change of ownership has caused further delay in deciding the plant's future.

Currently, PacifiCorp is actively studying the financial feasibility of the plant as well as the need for power generation in general. However, a final decision and actual repairs being made to the plant before the five year forfeiture timeframe are unlikely. Therefore, PacifiCorp is requesting a five year extension of time for these determinations to be made. In the meantime, PacifiCorp continues to meet its obligations for fish salvage and irrigation withdrawals.

Thank you for your consideration in this matter. If you have any questions or further information, please contact me at (801)220-2252.

Cordially,

Claudia Conder
Water Rights Administrator
