Gentlemen:

One of the conditions of approval of your water Permit No. 22-7032 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before July 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. McEldowney:

Application No. 22-7032

Replying to your letter of May 4, 1970, we have 10 shares of water of the Rexburg Irrigation Canal Co. and 20 acre feet of storage water of the Fremont-Madison Irrigation District. However, we are at the end of the canal and just can't get enough water.

We have 38 acres out of 144 under irrigation. We run the water in the barrow pit to bring up the sub once for the entire 144 acres the last of June or first of July. That is just all we can irrigate with the water being at the end of the ditch.

They can't supply the water continuously to us to pump and we can't get it early enough in the spring. Last spring our beets burned because we couldn't get the water early enough.

We had planned with the well to water the remaining 106 acres by sprinkling and to supplement the 38 acres with the well. We would continue to use our present water rights just as we have done.

Yours very truly,

GUY A. ERIKSON & KEITH ERIKSON

Mr. Guy A. Erikson and
Mr. Keith Erikson
Rexburg, Idaho 83440

Gentlemen:

We have processed and reviewed your application. Before final action is taken, we request clarification as to your irrigation proposal for the 144 acres listed in your application. Please advise which acres have existing water rights under the Rexburg Irrigation Company and which acres have water rights under the Fremont-Madison storage, the rate of diversion which you are applying to each and the method you are using to irrigate those acres such as surface irrigation, sub-irrigation, or sprinkler system, and explain your proposal for the continuance of use of these water rights.

The question arises out of your statement that you propose to sprinkler irrigate with a subterranean appropriation, while you also are maintaining water appropriations for flood, gravity or subterranean irrigation. We would assume you would not use both sprinkler and surface irrigation methods at the same time; therefore, we need clarification as to what you propose to do with the existing water rights as well as your new proposal.

Please contact us if we can assist you in clarifying our questions.

Very truly yours,

Donald W. McEldowney
