Gentlemen:

It has been brought to our attention that on or about
June 29, 1968, you had a well drilled.
The well is reported to be located at a point in the
NENW, Sec. 19, T. 7N, R.
45E, B.M. for irrigation use.

A search of our records has failed to find your application or approved permit. Under existing Idaho Statutes, Sections 42-226, 42-229, and 42-230 of the Idaho Code, you are required to file and obtain an approved permit before you divert waters from a subterranean source, with the exception of domestic wells which are defined under Section 42-111 of the Idaho Code.

If we have overlooked your permit, please advise the Department as to your permit number. However, if you have not yet filled out an application for permit, please use the instructions and the blank application form which we have enclosed.

We will be very happy to assist you with any questions you may have.

Very truly yours,

INSTRUCTIONS FOR FILING AN APPLICATION FOR PERMIT

The "Application for Permit" form should be used when it is desired to establish a new water right. It is recommended that the application be filed before any development is started. The application receives the priority date as of the date of filing.

If you have a water development that has already been completed and in use for a period of time, you may have already established a water right which will have a priority dating back to the first time of use. In these cases, you might not want to file the "Application for Permit" form and might wish to consider filing a "Claim to a Water Right" form. These claim forms are available from the Idaho Department of Reclamation.
