Gentlemen:

We acknowledge receipt of your affidavit submitted as proof of beneficial use on application for permit 22-7001.

Before a license can be issued a field examination must be made by a representative from this department.

We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system. If someone other than you should be contacted by the examiner, please advise.

Very truly yours,

Gentlemen:

One of the conditions of the approval of your permit
22-7001 was that proof of application of the water to
beneficial use be submitted to this office on or before _____
August 1, 1969.

Enclosed is an affidavit form which must be used to submit
this proof. You may request an extension of time provided the
delay is for reasonable cause as indicated in Section 42-204, ICA.

Either the proof or a request for extension must be received
by this department on or before the above mentioned date, otherwise
the permit will lapse and be of no further force or effect.

Dear Dr. Bowler:

In answer to your letter of July 15, 1968, we are enclosing the necessary forms with which you may make Proof of Beneficial Use.

As to your questions concerning the change on your permit and the fees charged, I am at a loss to explain why you were not notified prior to making the change. The reason for the change is because under Idaho law we may only grant 0.02 c.f.s. per acre of irrigated lands. In your case this would come to 0.3 c.f.s. It appears that the other 0.2 c.f.s. was allowed for the domestic use at the school. 0.5 c.f.s. is 225 gallons per minute which would appear to be quite liberal for your application. As to the fees that were charged, once an application is received by this office we cannot refund any fees.

I notice on your application that you stated that the domestic use would be utilized if needed at a later date. You should be aware that the use that you put the water to at the time you make Proof of Beneficial Use will limit your water right. I notice you have until August 1, 1969 before you are required to make proof. If you have not yet developed your system to its ultimate capacity and you think you might do so prior to August 1, 1969, it might be to your benefit to wait until that time to make proof.

If you have any further questions, please contact this office.

Very truly yours,

C. Stephen Allred, Assistant
State Reclamation Engineer

Dear Mr. McEldowney,

This letter is our certification of completion of the works and application of the water to the proposed beneficial use. The well is 110 feet deep, we have a 7 1/2 hp pump, the lawn has been planted, and is now being watered.

You changed our application from 1.0 cf/s to 0.5 cf/s , yet you did not return \$10.00 to us. We should ~~either~~ either be given 1.0 cf/s of water rights or you should refund \$10.00 .
