Yes, although my first e-mail to him was misrouted. The attached aerial shows the location of the two wells currently used and proposed for diversion of the transferred water. Mart Produce would like to be able to divert from either as necessary.

Call if you have any questions.

Jason

Jason,
Have you ever heard from this guy? I am still waiting for the well locations so I can get this transfer through the process. Regarding your side note question, the answer is no. It is only for domestic, not the plant. (Nice try though...) Jeanie

Jeanie,

The two wells shown are from the wr_pod.shp related to existing water rights 36-8457 and 36-8458. There are two wells out there that have been used for the plant and it would be preferred to have both listed for diversion of the transferred water. I have sent an aerial showing the locations to Jeff Harper (General Manager of Mart Produce) who is going to verify the locations and details.

On a side note, does 36-12216 provide 14.6 afa additional combined total volume available for all plant uses?

Thanks,

Jason

Jason,
The map for this transfer seems to show two wells at the commercial site but the application seems to refer to one existing commercial well. Will the transferred amount be going to only one well? If so, is it the one by the building on the aerial photo or the one by the edge of the pivot? Please take a look when you get a chance and let me know...Thanks, Jeanie
