

MEMORANDUM

Date: March 20, 2007
To: Transfer 73068
From: dcarlson
Re: transfer evaluation

This transfer proposes to drill their own well at the place of use on this 1.5 acre lot. They currently share a well.

The Overlapping CFS condition with 35-2737C and 35-13516 is not needed. There is no overlap limitation. the rights add up to the total CFS.

Applicant is not aware if they have any Danskin Canal shares with this lot. They would probably not have access the canal water due to the small lot and the location of the canal.

Authority to File:

Applicant is the owner of record as far as the water right decree. They completed an ownership change for this 1.5 acre lot. No change for the leinholder which is a mortgage for the home and lot.

Water Right Validity:

This water right was decreed in the SRBA in 2002. Forfeiture is not an issue.

Injury to Other Water Rights:

Inside the ESPA area and in Water District 120. The new well is within the same cell, no groundwater model analysis is needed. Watermaster will comment.

Transfer will be advertised to determine any protests.

Enlargement of Use:

There is no evidence of enlargement of use.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issue identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
