Cynthia,

Thanks for the reminder - I wasn't sure who to tell in your absence, but we have approved your proposed place of use and irrigated acre calculations. We look forward to receiving the preliminary recommendations. Hope you had a nice break!!

Jim

Jim,

Have you had a chance to look at this information? I will need to finalize our recommendations on these rights soon for the upcoming directors report.

Thank you,
Cynthia

Subject: Transfer no. 71145

Jim,

I have attached two jpeg images of the place of use associated with transfer no. 71145. Jason Helms was kind enough to send along the shapefile used to determine the irrigated area for the place of use associated with transfer

no. 71073 (same pou as Transfer no. 71145). The attached images show two shapes drafted to outline the irrigated area with background images from 1987 and 2004. The blue line is Jason's shape and the IDWR staff is identified in green. The total area included in the blue shape is 40.0 acres (34.6 acres in the large eastern shape and 5.4 acres in the western shape). The total area included in the green shape is 38.6 acres (34.0 acres in the east and 4.6 acres in the west shape). There are subtle differences in the delineation of the shapes, but after review by IDWR staff and review of available information, we feel this is a fair interpretation of the historical use of water on the land.

Please review the images and provide comments. Based on the shape provided here, the transfer approval could be reissued with an acre limit of 33.6 acres when the rights involved in transfer no. 71145 are combined.

I have also attached the files for the IDWR shapefile for reference.

Thank you for your help,
Cynthia
