

MEMORANDUM

TO: File

FROM: Steve Lester 

DATE: March 9, 2007

RE: Licensing Amendment for Permit 63-31133

An Application for Amendment was filed after proof of beneficial use was made for this permit. Consultant's cover letter noted the amendment was for licensing purposes.

IDWR email dated 3/8 and 3/9/2007 discusses this in more detail.

Note to field examiner – confirm the extent of development as of the “proof made” date to avoid expansion under the permit. Appears from consultant cover information that second well listed in amendment was in use by that time but need to verify all pertinent details.

Do not process this amendment unless it can be incorporated into the licensing process.

The amendment application was data entered prematurely. Database now shows two active records – one for permit and one for amendment application.

Active application record number 73012 should be deleted from the database to avoid confusion.

Subject: RE: Appl for Amendment of Permit 63-31133, Arena Valley

Steve,

I'm comfortable with your approach, as long as the field examiner confirms only the diversion capacity that was in place on 6/22/06 when proof of beneficial use was submitted. If the POD was connected after submitting proof, then they may have added capacity that was not available during the authorized development period. It will be the responsibility of the field examiner to determine when the POD was added and whether it contributed to the development of the permit.

Please be sure to send a memo with the amendment so that we don't accidentally try to process it right away.

Shelley

Subject: Appl for Amendment of Permit 63-31133, Arena Valley

Shelley:

Permit 63-31133 shows proof filed 6/22/06. An amendment application was filed 7/11/06 to change 1 p/d location. Amendment application cover letter from SPF states this is a licensing amendment since proof already filed.

That sounds like the right call for this one.

But we have a problem of what to do with the amendment application. Previously we would have put it in our regional shadow file for use when licensing exam done. Now we are more or less relying on scanned/microfilmed file info instead of hard copy shadow files so don't want to necessarily keep the application at region - might get overlooked down the road.

Suggested solution: Western can scan amendment application documents to PowerDocs, then forward originals to SO Vault file. That way this info won't be overlooked at exam time nor lost in some regional shadow file.

Sound good?

Steve

Subject: Application for Amendment of Permit 63-31133 for Licensing Purposes

Dear Steve:

Enclosed on behalf of Arena Valley Vineyards is an application for amendment of permit 63-31133. This application is submitted for licensing purposes, as the Proof of Beneficial Use has already been submitted for this permit. The application seeks recognition during licensing of a second point of diversion located in the SESE of Section 36, T5N, R6W. This second point of diversion is a 6-inch domestic well drilled in 1982 that has been used to supplement the irrigation supply from the 8-inch well that was drilled in 2001 under this permit.

Please contact me with any questions or if a filing fee is required for this application.

Sincerely,

Terry M. Scanlan
