Pre-Hearing - City of Arco
Transfer 72488

February 14, 2007 - 2:00 p.m.

Kent Foster - City's needs are lacking - They have 5 water rights. Add a point of diversion. Site - South of town $\frac{1}{2}$ mile from one of the City Wells. Mr. Wood will tell impacts of other wells.

Mr. Dyer: Map & facilities -
2 purposes: Land application system to treat the waste water - Treatment Facility uses land application - Common practices -
~~5.89 cfs~~ - 4.77 cfs

Questions: How does it work with 5 wells - only two are producing water - Need to drill new well - Why can't go deeper - Why drill some where some where else like in the Park -

Mr. Maynard - Pump. (new) - are you tying into existing system or is it separate.

Dyer - The lagoon area is better for treatment plant and growth of City.

Dyer - There is not enough water now - Wells are not producing -

Harvey - Does City have production of wells

Dyer - What ever the pumps are in there.

Maynard - If our personal well dries up - will you hook us up.

Wood - 600 ft - well is bad - expensive to operate -
City well is old -
Water Street Well - deepen 4 times -

Stratis - Push to get Surface water & storage water to use verses drilling a new well.

Wood - Perched water system -
4 miles West of site location.

The draw down numbers will be: - Worst case

Tyler Solution -

	Rate GPM	Stratis	Wood
	750	0.8 ft.	0.7 ft
3 1/2 yrs	1000	1.1	1.0
Steady pumping	1200	1.3	1.2
	2100	2.3	2.2

These draw downs are not unreasonable.
Worse case scenarios.

Dyer- Piping surface water it would cost 4 times verses drilling a new well?
- What will you do w/ surface water Right? Don't know.

No perforations - Zoned - City Shop wells are not good healthy reasons - Wants new well to have good water quality.

Wood, Tom - Observation wells - the more there are the easier it is to observe.

✓ No Discovery -

PRE-HEARING CONFERENCE
72488

Date: February 14, 2007
Time: 2:00 P.M.
Place: Arco Butte Business Center
Presiding Officer: Roger Warner
Assisted by: Sharla Cox

ROSTER OF ATTENDANCE
