Subject: FW: Possible water bank call

It you get a call from this fellow, you can pass it on to me Please print this e-mail and put copies in the referenced water right files as Steve suggests at the bottom

Thanks,
Cynthia

Subject: Possible water bank call

Hi Cynthia:

You might get a call from Jack Kane regarding filing an application to put portion of some rights in the water bank. These are natural flow irrigation rights from Scriver Creek in Garden Valley.

Jack is president of what functions as a homeowner association for a development. The entity is PTR Inc. Some of the property remains non-irrigated due to maintenance etc. problems in recent years. Recent history has been complex but boils down to this:

65-3222 & 65-8290 serve same acres.

65-3223 serves adjacent acres.

All 3 from same "north side ditch" for PTR.

All 3 decreed in SRBA in 2003

Records state share same diversion with 65-3221, 65-3224 & 65-3225 - that's wrong. Latter 3 are for PTR lands served by separate "south side ditch."

First three are subject of pending non-data entered application for transfer to correct the records. Transfer filed 5/2003 to resolve problems associated with denied Appl for Exchange involving 65-3222 & 65-8290, preliminary order 5/17/2005 by Gary Spackman.

Scriver Creek is inactive water district 65N. I guess any water bank action would be delegated to Ron Shurtleff for Payette River Rental Pool.

Jack said he will probably visit with Ron after getting a better feel for water bank application by talking to you. I've worked with Jack quite a bit over recent years about these rights so have more details if that becomes necessary. Please give me a call if I can do anything to help out later on.

Feel free to get this email scanned to 65-3222, 65-3223 & 65-8290 if you think that might be useful later on. Or there might be a hard copy file in the vault at least for 3222 & 8290 due to the denied exchange application.

Steve
