Subject: Arco Water

Roger:

As you know, we have retained Tom Wood to look at our situation with the proposed well in Arco. He has done an analysis which has concluded that even after allowing significant safety factors, Arco's proposed well will not have a negative impact on those that are protesting the water right transfer. We will be sitting down with the protesters to go through this information with them and see if they would be willing to remove their protest.

However, I have been instructed by the city that in the meantime we are to schedule a formal hearing with IDWR at the earliest possible date so this whole matter can move forward before Rural Development de-obligates the funding that is still remaining for well construction (this is a serious matter - we stand to lose about \$100,000 in grant funds). That way, if the protesters are not responsive we will not have wasted any time.

Please be kind enough to schedule us for a formal hearing and/or inform me of what steps we must take to do so ASAP. Many thanks for your kind assistance...
