Thanks for the update. Are you still working towards keeping water in the lower ditch for juvenile fish habitat? Greg did leave a voice mail on my Salmon phone. Its best to reach me at the number below. Let me know what I can do to help.

Rod - I'm sorry we have not been able to touch bases. I have been out of the office a great deal and apologize for not getting back to you sooner. I asked Greg Lowell from to contact you while I was out to give you an update, he indicated that he tried to reach you twice in November without success. The screen shop is in the process of mapping the whole ditch system after their field tour this fall. We hope to have some strategies for proper screening to prevent entrainment in the near future that we can share with the landowners/water users. Once that is complete we will need to meet with individual water users to make agreements. If there are no major stumbling blocks with the water users then I see no reason that your permit cannot be processed at that point. I'll be in touch once we have a completed map of the system. Thx Tom Curet
