900 N. Skyline dr., Ste A
Idaho Falls, Id 83402-1718

Attention: W. Roger Warner
Water Rights Supervisor

Regarding my application for Water Rights it is important that I inform you that I purchased this property on William's Creek Rd in the early 1970's. At that time I was informed that I had High Water Rights out of William's Creek. The Creek runs the whole distance through my property. It was at that time I started watering my property from the Creek. A few years later I changed to Sprinkler irrigation from the Creek using a 3HP ditch pump. Originally it had been stated in application form that it was a 10 HP pump but I have only used a 3HP pump, and it is very important that I notify you of this error.

Sincerely,
