APPLICATION FOR PERMIT

To appropriate the public water of the State of Idaho

10. Remarks:

This application proposes to store and use additional wastewater not covered by Permits 37-21456 and 37-21486. The NRCS, who is providing funding and technical assistance on this project, found a site where more water can be stored for about the same construction costs. Instead of the two ponds originally proposed, one larger pond (10 surface acres x 9.9 feet average depth) will be built. Except for a longer pipeline from the pond to the place of use, the rest of the project will remain the same. Any water that cannot be contained in the pond will be discharged into Birch Creek over the spillway, or into the Malad River through the existing wasteway.

11. Map of proposed point of diversion and place of use attached? ☐

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.
