Boise, Idaho 83720-0098

Dear Mr. Dreher:

On January 18, 2004 I made a Call on Water for my domestic, on Right 36-00073. I would like to **MAKE A CALL** on my stock water Right, which is also on the same Right 36-00073 (dated 1881). It has a stock water Right of .04 c.f.s. or 18 g.p.m. The 18 g.p.m. for stock water and the 9 g.p.m. for domestic add up to 27 g.p.m.

On January 18, 2004 the total spring was flowing at 7.8 g.p.m. and on March 4, 2004 – yesterday – it was flowing at 6.67 g.p.m. That is a 14% drop in a month and a half. My heat pump that heats and cools the house takes 5 g.p.m. What happens if I take a shower, or turn the dishwasher on, or flush the toilet, or my cows drink in the corral, or my lawn needs watered. Half the value of my place is the water. If you don't believe that come out and see it. I have to have that water.

Between you or the pumpers I need an agreement before April 1, 2004.

Sincerely,

Layne Osborne
