Subject: Your E-Mail of 4-5-02 RE Transfer 69699 & Rt. 36-2324

The SRBA Court's homepage says that this amended partial decree was issued 9-25-01, so our records should have been updated months ago. Doug tells me that this right is being readied for a batch dump into the WR database, but doesn't know when this will occur. This is going to be a never-ending problem based on present SRBA & WR policies; the only way that I can see to fix this problem is to let the allocation agents choose which record will be used as a basis for the transfer. Both Don & Doug Jones are automatically informed by e-mail of any transfers that are filed (as part of the data-entry process), but I don't know what they do with this information. Doug's records do show the pending transfer on 2324. Doug said that they could pull this record out of the pile for early movement to the WR database if necessary. This property is in the new water district #130, so I don't know what effect this will have on the transfer process.

Where do we go from here? I am finishing my review of this application, and plan on getting it to Mary for advertising soon. One of the rights involved in the transfer has numerous objections, so the process will be delayed until that can be dealt with.
