WATER EASEMENT AGREEMENT

AUG 13 4 27 PM '91

B TCH TAGGART

FEES 18.00 DEPUTY

THIS WATER EASEMENT AGREEMENT ("Agreement") is entered into and effective this 7th day of August, 1991, by and between SHEILA BROWN, individually and as the personal representative of the Estate of L.V. Brown, deceased ("Brown"); and BRENT F. REGAN and MOURA M. REGAN, husband and wife (collectively "Regan"), with reference to the following facts:

A. Concurrently with the execution of this Agreement, Regan is purchasing from Brown approximately eighty (80) acres of unimproved land in Kootenai County, Idaho, more particularly described as follows (the "Benefitted Property").

The South Half of the Southeast Quarter of
Section 14, Township 53 North, Range 4 West,
B.M., Kootenai County, State of Idaho.

B. Brown is the owner of an adjacent parcel of land, also located in Kootenai County, Idaho, more particularly described as follows (the "Burdened Property"):

The North Half of the Northwest Quarter of
Section 24, and the South Half of the
Southwest Quarter of Section 13, all in
Township 53 North, Range 4 West, B.M.,
Kootenai County, State of Idaho.

C. On the Burdened Property is presently located a water well, a three and one-half horsepower pump and appurtenances, and a delivery pipe from the well to the boundary of the Benefitted Property (collectively referred to herein as the "Water System").

D. As part of the consideration for Regan's purchase of the Benefitted Property, Brown has agreed to allow Regan and their successors with respect to the Benefitted Property, to use the Water System, subject to the terms and conditions set forth in this Agreement.

NOW, THEREFORE, the parties agree as follows:

1. Grant of Easement. Brown hereby grants to Regan the perpetual exclusive (except to the extent of well sharing described in this Paragraph) right to use the Water System for purposes of providing domestic water to the Benefitted Property, including the right to use the existing equipment (title to which shall remain in Brown), the right to operate, maintain, repair, replace, and upgrade the Water System and any or all of its

components, and the right of access over and across the Burdened Property and to the Water System (including the pumphouse) for the purposes described herein. Regan's right to use the Water System shall, however, be subject to the following restrictions:

1.1 All costs incurred with respect to the Water System shall be borne by Regan alone, and Brown shall have no responsibility to contribute to, or otherwise participate in, any expenses associated with Regan's use of the Water System;

1.2 Regan shall have no right to install pumping equipment capable of delivering more than one hundred (100) gallons per minute to the Benefitted Property;

1.3 Regan shall have no right to service more than 9 domestic users with the Water System; and W/INT 9

1.4 Regan's use of the Water System shall not unreasonably interfere with Brown's continued use of the well for agricultural purposes (utilizing a separate pump, which is not covered by this Agreement), consistent with its current use. While the rights granted by this Agreement are exclusive to Regan, nothing herein shall be construed as preventing Brown from continuing the use of its separate pumping system for the benefit of the Burdened Property and other property currently owned by Brown.

2. Payment for Water Service. As consideration for the grant of water rights under this Agreement, Regan shall pay to Brown a monthly user fee with respect to each domestic hook-up, in an amount equal to the average water fee paid by users of domestic water provided by the City of Athol to its residents. When installing a hook-up, Regan agrees to provide a shut-off valve to which Brown shall have legal access, and Brown shall have the right to terminate water service to any user by closing such valve during any period of delinquency. Brown's right to shut off water service, and to collect penalties for late payments, shall be the same rights as are available to the City of Athol under such laws and ordinances as may be in effect from time to time.

3. No Warranty; Hold Harmless. Regan expressly acknowledges that Brown has provided no warranty with respect to the quality or quantity of water that may be delivered from the Water System. Regan hereby agrees to indemnify, defend, and hold Brown harmless from and against all claims and liabilities that may arise out of or otherwise derive from the use of the Water System by Regan or its successors with respect to the Benefitted Property.

Filed out under 100-1000000.

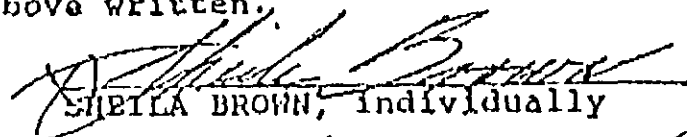

4. Assignment. The terms of this Agreement shall run with the land and shall be binding upon and inure to the benefit of Regan and Brown and their respective successors and assigns with respect to the Benefitted Property and the Burdened Property. Upon sale of all or any portion of the Benefitted Property, the assignee shall be deemed to have assumed all responsibilities under this Agreement with respect to the parcel purchased, and Regan shall be deemed automatically released from all further liabilities with respect to such parcel.

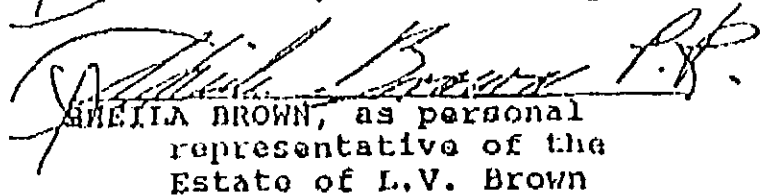

5. Miscellaneous and Procedural.

5.1 Attorney's Fees. If legal action is required or deemed necessary to enforce or interpret any of the provisions of this Agreement, the prevailing party shall be entitled to recover its costs of suit, including reasonable attorney's fees, incurred in connection therewith.

5.2 Integrated Agreement; Modification. This Agreement contains all agreements of the parties and may not be amended or modified except in writing signed by the party to be charged with such amendment or modification.

IN WITNESS WHEREOF, the parties have entered into this Agreement as of the date first above written.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 96-08924

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions concerning the field examination, please contact the **NORTHERN** Regional Office of the department in Coeur d'Alene at (208)769-1450.

Sincerely,

JULIE L. YARBROUGH, Administrative Assistant

PROOF DUE NOTICE

RE: PERMIT NO. 96-08924

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1999.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

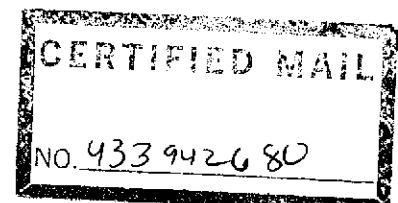

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: PERMIT NO. 96-08924

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "Conditions of Approval and Remarks" listing on the permit.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a "Proof Due Notice" approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

Re: Water Appropriation Application No. 96-08924

Dear Mr. Anderson:

The Idaho Department of Water Resources hereby acknowledges receipt of the above referenced Application for Permit to appropriate the Public Waters of the State of Idaho. To assist us in providing you with prompt, accurate service, please refer to the above referenced number in all future matters concerning this water right application.

Your appropriation application is currently being prepared for advertising in the local county newspaper. This advertisement will be published for two consecutive weeks followed by a waiting period of ten days to allow for the submittal of protests. Normal processing time is approximately 3 to 4 months, if the application is not protested.

If the application is not protested, it will be forwarded to Boise to be considered for approval by the Director. State office personnel will then conduct a complete review, and you will be notified by mail of the outcome. However, if the application is protested during this waiting period, you will be sent a copy of the protest and instructions to aid you in resolving the protest without a hearing. All protests must be resolved before approval of the application can be made, so if the protestant does not voluntarily withdraw the protest, this department will conduct a conference and/or hearing on the matter.

You will receive your approved Application for Permit and instructions on filing the Proof of Beneficial Use from our State office in Boise.

If your source is groundwater, a Well Drilling Permit is required for all wells constructed after July 1, 1987.

A "Domestic" well drilling permit should be obtained for a rate of diversion of up to 18 gallons per minute (0.04 CFS) and a daily volume of up to 2,500 gallons per day. The cost for this permit is \$35.00. For any other use, including multiple homes, or municipal, etc., the Drilling Permit fee is \$200. It is possible to upgrade a Domestic Drilling Permit by submitting an additional \$165.00. These Permits can be obtained by your driller, also.

If you have any questions or if I can be of any assistance please feel free to contact me at this office.

Sincerely,

ALLEN BEARDSLEE
Senior Water Resources Agent

Diane, the data entry of this application looks good. I would suggest that you add the information about the organization just being formed and the names of the officers, etc. being provided as soon as possible to a comment in the database. Then also I would attach a stickie or some kind of note to the front of the application file when you get ready to send it to the State Office noting that the information is still forth-coming, if that's the case at the time you're ready to send it. That way the application reviewer will be aware of that up front.

Let me know if there's anything else you need.

Sharla
