RE: Permit No. 16875

Mr. Paul A. Van Schravendyk
P. O. Box No. 245
Hope, Idaho

Dear Mr. Van Schravendyk:

Due to an extra ordinarily busy season your application for transfer of point of diversion was not even acknowledged, for which we apologise.

The statutory procedure for changing a point of diversion involves advertising and examination, but the main requirement for approval of an application to change a point of diversion is that it will not damage any other water right.

From our analysis of your situation it seems that you want an additional point of diversion. If there are no other diversions between the existing point and the additional proposed point, you would probably be justified in assuming that there could be no valid protests and taking a chance on later approval.

As soon as our Supervisor of Water Distribution returns from his present field trip your application for transfer will be processed. In the meantime if you are willing to take the chance that there will be no valid protests you can go ahead with the additional point of diversion.

Very truly yours,

MARK R. KULP

RE: Permit No. 16875

Mr. Paul A. Van Schravendyk
P. O. Box No. 245
Hope, Idaho

Dear Mr. Van Schravendyk:

Reference is made to your letter of June 5, 1954, in regard to Permit No. 16875.

We are sorry we misunderstood your former letter as we thought what you had in mind was filing an application for supplemental permit with the point of diversion further up stream.

It is true that the original filing of Christina Van Schravendyk was for .5 of a second foot of water but when final proof was made, License was only for .2 of a second foot or 10 inches of water for use on 10 acres of land.

The only way to obtain more water would be to file a new application but it would have to show use for more than 10 acres as 1 inch per acre is the maximum allowed by statutes for irrigation purposes.

In order to change the point of diversion under your present license, application should be filed on the form enclosed which is applicable for either a decreed or a licensed water right, which should be completed by you and returned to this department.

This change would be made in accordance with Section 42-222 Idaho Code which requires publication once a week for two weeks in the county where the water is located and then if no protests are filed, a Certificate for Change of Point of Diversion can be issued upon receipt of the recording fee of \$1.00.

Dear Mr. Kulb,

In answer to your letter of June 1 I wish to state that there evidently is an error either in your letter or in the recording of my water right for my water right allows me 0.5 sec. ft. which is enough water for my new set up. After talking with the soil conservation officer here he recommended that I ask for permission to change the point of diversion to the N. W. $\frac{1}{4}$ S E $\frac{1}{4}$ Sec. 27 T 57N R 1 E. He seemed to feel that all I would need would be a rider from you to attach to my present water right NO. 16875.

Would you please let me know.

Yours very truly,

Dear Mr. Van Schravendyk:

We have your letter of May 29 in regard to obtaining a water right from Hope Creek and in reply we are enclosing a form of application for such permit together with a pamphlet giving regulations and instructions in regard to filing on same.

We assume the water right you refer to is License No. 16875 in the name of Christina Van Schravendyk for .2 second foot (or 10 inches) of water from Hope Creek with priority of May 9, 1928.

When the application is approved, it will be signed by the proper State Officials and sent you as a use permit under which you may proceed with the construction of the work described in the application. In order to complete your water right, two proofs are required as follows:

First, proof of completion of works which is made by affidavit before a Notary Public. The time required for making this proof should be stated under Question 12 in the application.

The final proof is made when the water has been completely applied for irrigation or whatever purpose it is intended. Notice of such proof must be published for four consecutive weeks in a county newspaper at your expense, and at the time set for proof, depositions are to be executed by yourself and two witnesses in proof of such beneficial use. The additional time required for making this proof should be stated under Question 13 in the application.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Christina VanSchravendyk
Hope, Idaho

Boise, Idaho,

Dear Sir:—

Under the terms of your permit No. 16875 you are required to complete your diversion works on or before Nov. 29, 1928. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

GEO. H. CARTER
Commissioner of Reclamation.

Dear Sir:—

I enclose herewith blank notice of proof of application of water to beneficial use under your permit No. ~~16875~~, which should be filled out and returned to this office at least 60 days before the date upon which you wish to make proof. The date for proof, as set out in your permit, is ~~Nov. 23, 1928~~, and, if proof is submitted subsequent to said date, your priority will be brought down a length of time equal to the time elapsing between the date proof should have been made and the date proof is actually made.

Yours truly,

GEO. N. CARTER,
Commissioner of Reclamation.

Re: Application for permit.

Christina Van Schravendyk,
Hope, Idaho.

Dear Madam:

There are no previous valid filings on Hope Creek of record in this office. We are returning application for filing fee of \$1.00. Also answer Paragraphs 10, 11, 12, 13, and 14, especially designating the amount of acres to be irrigated in each forty-acre subdivision. This application shows ten acres to be irrigated, but does not specify the actual location of same.

Very truly yours,

GEO. M. CARTER,
Commissioner of Reclamation,

By

Enc.
