Dear Sir:-

We are in receipt of depositions of yourself and two witnesses, together with the affidavit of publication for proof of beneficial use of water under your above permit. These are in proper form and will be placed on file here without final action until the report can be made by our field engineer. It will probably be six weeks or two months before we will have an engineer in the field in the northern part of the state but your permit will not be jeopardized in any way by reason of the delay in making the examination.

Re: Permit No. 16398.

Mr. T. L. Greer,
Sandpoint, Idaho.

Dear Sir:-

Referring to your letter of the 26th inst. would say the first step toward making proof of beneficial use of water is to fill out the enclosed blank notices and return same to this office, the date for making said proof being set far enough in advance to allow for the required four weeks publication of the notice. Deposition blanks for holder and two witnesses will then be mailed to the notary public, or other officer before whom proof is to be made.

My dear Sir:

Under the terms of permit 16398, issued to me August 1, 1927 you state that on completion of the irrigation works and the putting of the same to beneficial use, to apply to you for further information towards making the last proof.

I would be pleased to have any other forms that you may have, and please give me information on what to do to establish my permanent right to the use of water from this creek. It has been used on my place for the last 15 or 20 years but no decree has ever been entered and I am anxious to secure the permanent decree for this water.

Thanking you for your attention to the matter, I remain

Very truly yours,

Re: Permit No. 16398.

Mr. T. L. Greer,
Sandpoint, Idaho.

Dear Sir:

In checking up on your affidavit of proof of completion of works, we find that the point of diversion as given in your affidavit, i.e., NE $\frac{1}{4}$, Sec. 4, T. 55 N., R. 2 W., does not agree with the point of diversion given in the permit, which is given as the SE $\frac{1}{4}$ HW $\frac{1}{4}$, Sec. 4, T. 55 N., R. 2 W.

If the point of diversion given in the permit is not correct, it can be corrected by filling out the enclosed affidavit.

Very truly yours,

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Mr. T. L. Greer,
Campana, Idaho.

Boise, Idaho,

Dear Sir:—

Under the terms of your permit No. ~~16398~~..... you are required to complete your diversion works on or before ~~Nov. 23, 1927~~..... I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

GEO. H. CARTER.
Commissioner of Reclamation.

Re: Application

Mr. T. L. Greer,
Sandpoint, Idaho

Dear Sir:

This will acknowledge receipt of your application for permit to appropriate two cubic feet per second of the waters of South Fork of Westmond Creek.

Your application cannot be approved, designating a temporary and constantly changing point of diversion. I have, therefore, changed the application so that your point of diversion will be in the Southeast Quarter of the Northwest Quarter of Section Four, Township Fifty-five North, Range Two West B. M. You will readily understand that if there are other water rights in effect on this stream, it is impractical for you to be diverting water at various points along the stream. Ordinary irrigation practice requires that the point of diversion be fixed and in case of division of water with other claimants, a measuring device must be provided so that the amount of water being taken is readily ascertained and likewise the place where it will be claimed is definitely known.

You have neglected to enclose the required fee of \$1.10. Upon receipt of this fee, together with return of the application, the same can be approved in the form it now bears.

Very truly yours,

W. G. SWENDSEN
