Remarks: The land to be irrigated is burnt over timber land, and will require much labor to clear it, and put it in condition to be irrigated, Hence the time required for application of water to proposed use.

Cataract Creek is a small mountain stream which has never been used by any one. There is probably less than a cu.ft. of water runs in the dryest part of the season, but I thought best to make application for 1 cu.ft. in order to cover the flow.
