We attempted to issue a license on this one last year, but the right holder didn't agree with the rate of diversion. On July 24, 1998 you sent a mail message to Shelley asking us to hold up licensing so that the project engineer could prove that they divert the full permitted amount.

That's the last thing we have in the file. Do you want to pursue the matter or would you like us to rattle their cage? We need to set a time limit to submit evidence of higher diversion rate, otherwise the license will be sent up for signature.

Shelley,

Hold up on licensing this permit. We recommended less diversion rate than what permit was for, based on field review. The project engineer says he can prove to us that they divert the full amount. It's supposed to happen soon.

RE: Recommendation Adjustment(s)

The adjustments to licensing recommendations for Permit No. 95-08961 are as follows:

H. RECOMMENDATIONS

Commercial	1/1 - 12/31	0.04 cfs	27.2 afa
------------	-------------	----------	----------

This filing represents the use of a new well and the use of additional flow above and beyond the current water right covering this water use (license 95-08641). The water use itself has not changed and the volume to be listed on the license reflects the maximum volume calculated under the previous license (see attached memo from reviewer dated 10/3/95). A condition will be added limiting the annual volume to 27.2 af under the two rights combined.

Exam Date: July 2, 1998

Examiner: David David Pagel

MEMORANDUM

DATE: October 3, 1995
TO: File No. 95-08641
FROM: Cindy Zimmerman
SUBJECT: Review of Beneficial Use Field Report

=====

The field examiner based his recommended diversion rate on a combination of two points of diversion. Flow Schematic, page 2 of 2, Silver Beach Marina Water System plans, recorded drawing 0754DT55 (attached to field exam) clearly indicates that one of the point of diversions identified by the field examiner is a relift from storage not a point of diversion from the source. Therefore, the diversion rate I recommended is based on the single point of diversion from the source and the following adjustments were made on the field report:

1. Rate of diversion.
 - a. Well capacity = $\frac{8.8 \times 0.75 \times 1.5 \text{ hp}}{10 + (2.31 \times 55 \text{ psi})} = \frac{9.24}{137.05} = 0.07 \text{ cfs}$
 - b. Per Flow Schematic plan, flow is limited by a flow restrictor to 20 gpm = 0.04 cfs.
2. Annual Volume.
 - a. Commercial use, per Al Beardslee, average 3 people per boat for 300 boat slips
 - i. Marina use = $(\text{people} \times \text{gal/day} \times \text{days/yr}) \div 325,850$
= $(900 \times 15 \times 365) \div 325,850$
= $4,927,500 \div 325,850$
= 15.1 AF.
 - ii. Restaurant/lounge use = $(900 \times 12 \times 365) \div 325,850$
= $3,942,000 \div 325,850$
= 12.1 AF.
 - iii. Total Annual Volume = i + ii
= 15.1 + 12.1
= 27.2 AF.

E. NARRATIVE/REMARKS/COMMENTS

Groundwater is being diverted at a rate of ^{.04}~~.03~~ cfs (Theoretical calculation) and is stored in 5- 12,000 gallon storage tanks, a total capacity of 60,000 gallons.

Commercial use is for a bar/restaurant with a maximum capacity of 64 persons, and a 366 slip marina. Marina has 152 fixtures on docks. The measurement was taken from one of two precision meters that are located inline after the storage tanks. I was unable to obtain a measurement, or information pertaining to the direct output of the pump.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} =$$

2. Volume Calculations for Other Uses: Restaurant Capacity = 64 persons (64 persons)(10 gpd) = 6400 gpd

$$6400 \times 2 (\text{times/day: full occupancy}) = 12,800 \text{ gpd} \times 365 \text{ days} = 4,672,000 / 325,850 = 14.34 \text{ afa}$$

Marine Capacity:

$$366 \text{ people} \times 35 \text{ gpd} = 12,810 \text{ gpd} \times 180 \text{ days (seasonal use)} = 2,305,800 \text{ gal} / 325,850 = 7.08 \text{ afa}$$

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 95-08961

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions concerning the field examination, please contact the department's NORTHERN Regional Office in Coeur d'Alene at (208) 769-1450.

Sincerely,

JULIE L. YARBROUGH

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 95-08961

Dear Permit Holder:

The Department of Water Resources (IDWR) has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a preliminary order issued by IDWR pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by IDWR unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

If a well has not already been constructed you are required to obtain a "drilling permit" from the department. The right to drill a well is not a part of this permit to appropriate water.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

Re: Water Appropriation Application No. 95-08961

Gentlemen:

The Idaho Department of Water Resources hereby acknowledges receipt of the above referenced Application for Permit to appropriate the Public Waters of the State of Idaho. To assist us in providing you with prompt, accurate service, please refer to the above referenced number in all future matters concerning this water right application. Enclosed for your file is Receipt Number N011087.

Your appropriation application is currently being prepared for advertising in the local county newspaper. This advertisement will be published for two consecutive weeks followed by a waiting period of ten days to allow for the submittal of protests. Normal processing time is approximately 3 to 4 months, if the application is not protested.

If the application is not protested, it will be forwarded to Boise to be considered for approval by the Director. State office personnel will then conduct a complete review, and you will be notified by mail of the outcome. However, if the application is protested during this waiting period, you will be sent a copy of the protest and instructions to aid you in resolving the protest without a hearing. All protests must be resolved before approval of the application can be made, so if the protestant does not voluntarily withdraw the protest, this department will conduct a conference and/or hearing on the matter.

You will receive your approved Application for Permit and instructions on filing the Proof of Beneficial Use from our State office in Boise.

If your source is groundwater, a Well Drilling Permit is required for all wells constructed after July 1, 1987.

A "Domestic" well drilling permit should be obtained for a rate of diversion of up to 18 gallons per minute (0.04 CFS) and a daily volume of up to 2,500 gallons per day. The cost for this permit is \$75.00. For any other use, including multiple homes, or municipal, etc., the Drilling Permit fee is \$200. These Permits can be obtained by your driller, also. It is sometimes possible to upgrade an existing Domestic Drilling Permit by submitting a fee for the difference. This, however, depends on the individual well.

If you have any questions or if I can be of any assistance please feel free to contact me at this office.

Sincerely,

ALLEN BEARDSLEE
Senior Water Resources Agent
