**SHARED WELL AGREEMENT
MORGAN ESTATES 1ST ADDITION
KOOTENAI COUNTY, IDAHO**

STATE OF IDAHO }
COUNTY OF KOOTENAI } ss
AT THE REQUEST OF
FIRST AMERICAN TITLE COMPANY

SEP 27 3 57 PM '99

DANIEL J. ENGLISH

DEPUTY
FEE\$

On this 16th day of September, 1999, as the owner of Parcels 1 through 4, Morgan Estates 1st Addition, Kootenai County, Idaho, TERRY MORGAN, an unmarried man, declares that these parcels do not have service available to them from an acceptable public or community water supply system. Therefore, as the current owner and seller of these parcels, Terry Morgan agrees to provide water service by extending the line from his own well on/along an easement as shown on preliminary title report, then south inside the west property line of parcel #3, to the culdesac area with individual lines to each parcel. Morgans well supplies enough water to provide a continuing supply of at least three (3) gallons per minutes to each parcel simultaneously (as required in HUD Manual regarding "shared wells") of safe and potable water (as evidenced by recent test results from Idaho State Laboratory).

As the owner of the four parcels and the well, Terry Morgan states that the water is shared subject to the following guidelines, which shall be recorded in the public records of Kootenai County, Idaho, and shall be binding on all future owners of each parcel:

- 1) The main water line shall be installed from the well to each of the four parcels by Terry Morgan. Installation of service line from the main line to the dwelling, any necessary repairs and maintenance of that service line, repair of any damage done by a resident of the parcel or their guests, and repairs of any detected leaks in the service lines, shall all be done at the expense of the owner of the parcel being served. Damage to the service line or detected leaks must be repaired promptly to prevent damage to the system or waste of water. Maintenance and repair of the main line shall be done by Terry Morgan until system is turned over to a users association. All work on the system must be done within the confines of the easements.
- 2) Parcels owners understand and agree that the current water system may be upgraded at the option of the owner of the well and the seller, Terry Morgan. Parcel owners agree to allow that upgrade, to not interfere with the work, and to share in the cost in the same amount and manner as other parcel owners served by the same system.
- 3) Parcel owners understand and agree, that until all of the parcels are sold and all the users of the water system are hooked up, the current well and system is owned by Terry Morgan. At the time all are sold, a non-profit water users association shall be formed and the system will be deeded to the association and all maintenance shall be done by that association. The owners of each of these parcels shall be considered members of that association and will have equal say in the decisions of that association. Water meters may be installed and monthly fees charged and these parcel owners agree to pay rates according to the association agreement.

MICROFILMED

SEP 28 1999

Shared Well Agreement / Morgan Estates 1st Addition: pg 2/3

Until that time, each user agrees to pay TWENTY DOLLARS per month PLUS a prorated share of the power bill (from the meter serving the pump), calculated by dividing the amount of the bill by the number of users. Payment shall be made promptly to designated party from time to time, to be gathered and paid to the power company with extra funds held in designated account to cover cost of water tests, repairs/maintenance beneficial to all users, etc.

4) No parcel owner shall ever block, deter or infringe upon the usage, repair, or maintenance of that water line by the other parcel owners or hired contractors.

5) Until the association is formed, maintenance and/or improvement of that common water line shall be the responsibility of the parcel owners. The cost of all maintenance and/or improvement of the water line shall be divided equally between the parcel owners using the system, PROVIDED THAT a majority of those owners agrees that said maintenance and/or improvement is needed and shall be done. Failure to pay the agreed upon charges could result in small claims action against that parcel owner, by any of the other parcel owners, and could result in a lien on the subject parcel.

6) Parcel owners are restricted from locating or relocating any element of an individual sewage disposal system within 50 feet of the shared well. No parcel owner may install landscaping or improvements that will impair use of the water lines or any easements for those water lines. Any landscaping, fencing, walls, etc. which may interfere with the operations, inspection, replacement, improvement, or maintenance/repairs of the system within the allotted easements may be removed by the association, a member, or a hired contractor to allow accessibility to work. Any cost of removal or replacement shall be charged to the owner(s) of the improvement. The owner will be given a reasonable notice of intent and an opportunity to move the improvement themselves.

7) The consent of a majority of all users sharing costs, shall be required for maintenance, replacement or improvement of the system before actions are taken, except in emergency situations. In the event of an emergency, any water user may take appropriate action to protect the system, and the users and/or their property. An emergency shall be defined as failure of the system to provide water on demand, system failure due to breakage, etc. Emergency situation correction costs shall be shared equally. Any necessary replacement or improvement of a system element (s) will at least restore original system performance.

8) Water quality tests shall be taken from time to time on a regular schedule and the costs of those shall be shared by the users. Additional testing may be done at any time at the request of any party, at their own expense. Any corrective measures needed as indicated by the tests, whether done on the schedule or done by an individual user, will be implemented promptly and the costs shall be shared. Unless it is a health threatening situation, corrective measures will require the approval of the majority of the users.

MICROFILMED
MAR 26 2003

1607866

Water Users Agreement/Morgan Estates 1st Addition: pg 3/3

9) Water is intended to be used for domestic purposes only, including household, watering yard, and watering domestic pets or livestock. Commercial, agricultural, and irrigation uses are not permitted.

10) This agreement was prepared by Terry Morgan and is intended to be beneficial to the owners/purchaser of these parcels. In the event of a dispute or impasse between parties, regarding the system, the costs, or the terms of this agreement, any party to the agreement may initiate binding arbitration. Arbitration shall be done through the American Arbitration Association or a similar body and costs shall be shared equally by all parties to the agreement.

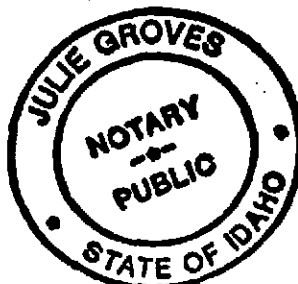

This Water Service Agreement shall be binding on all owners of these parcels, their heirs and assigns, and is to remain in force until a mutually agreeable replacement is signed by all parcel owners and recorded, or until all parcel owners agree and sign a termination of this declaration and have it recorded, or until formation of a water users association as above.

Terry J. Morgan

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 96-9094

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form and examination fee submitted for the above referenced permit. Enclosed is an order reinstating the permit advancing the priority since proof was submitted after the proof due date. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. The regional office staff will contact you when that examination is to be conducted. At the time the examination is conducted the system must be in operation, otherwise this permit will be of no force nor effect.

Be advised that Section 42-248, Idaho Code, requires you or the owner of these water rights to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions concerning the field examination, please contact the **Northern** Regional Office of the department in Coeur d'Alene at (208) 769-1450.

Sincerely,

Deborah J. Gibson
Administrative Assistant
Water Allocation Bureau

LAPSE NOTICE

RE: PERMIT NO. 96-9094

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in the proof due notice dated June 30, 2003. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifty dollar (\$50.00) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

Sincerely,

L. Glen Saxton, Chief
Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 96-9094

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 01, 2003. (See last page of your approval permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

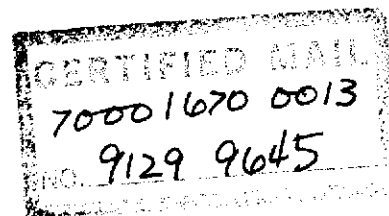

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

Sincerely,

Deborah J. Gibson, Administrative Assistant
Water Allocation Bureau

RE: Permit No. 96-9094

Permit Approval Notice

Dear Permit Holder:

The Department of Water Resources has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a form entitled 'Instructions for Proof of Beneficial Use.' Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled 'Proof of Beneficial Use.' If your project is already completed, you should complete and submit this form immediately.

The right to drill a well is not a part of this permit to appropriate water. Beginning in July of 1987, a statute was enacted which requires a drilling permit for new well construction and deepening of existing wells. If the well(s) proposed for use under this water right permit were drilled or deepened after July 1, 1987, a separate drilling permit must be obtained from this Department. Please contact the Ground Water Protection Section located here at this office or our regional office nearest you.

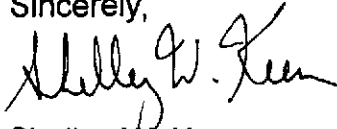

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Application for Permit No 96-9094

Dear Applicant(s):

The Department of Water Resources acknowledges receipt of your water right application. Please refer to the above referenced number in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the Coeur d'Alene Press on April 18 and 25, 2002. Submittal of protests to this application will be allowed for a period ending ten days after the second publication.

If the application is protested you will be sent a copy of the protest(s). All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in Boise for final processing. The State Office will notify you of any action taken on the application and will send you a copy of the permit if approved. A typical processing time for an unprotested application is about eight to twelve weeks.

Please feel free to contact this office if you have any questions.

Sincerely,

Allen Beardslee
Senior Water Resource Agent
