has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated April 9, 1991; and
has submitted Proof of Beneficial Use on May 28, 1992. An examination indicates
that the works have a diversion capacity of 0.080 cfs of water from:

PEND OREILLE LAKE

tributary to PEND OREILLE RIVER

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	03/15 to 11/15	0.08 CFS	4.5 AF

LOCATION OF POINT(S) OF DIVERSION: Lot 2(SWNW), Sec. 22, Township 56N, Range 01W

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than 3.0 afa per acre for the lands above.

TO: File 96-08636

FROM: Sharla

DATE: June 10, 1996

RE: Recommendation Adjustment(s)

The final license recommendations for Right 96-08636 are based on the following:

F. FLOW CALCULATIONS

H. RECOMMENDATIONS

1. Recommended Amounts

This water delivery system utilizes a pressure tank which diminishes the accuracy of a measurement using a 5 gallon bucket. On April 9, 1991 the department received a letter from the Forest Service with their justification for an excessive rate of diversion over the standard inch per acre. In this letter, the irrigation system is described as 7 stations with 7 sprinkler heads each, with each head using 5.4 gpm.

Based on the above information, the rate of diversion (as well as capacity) will be licensed at $5.4 \text{ gpm} \times 7 \text{ heads} = 37.8 \text{ gpm}$ - 0.08 cfs.

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Irrigation	3/15 - 11/15	0.08 cfs	4.5 afa

The irrigation season of use has been changed to the current recommended guidelines in that area.

PROOF DUE NOTICE

RE: PERMIT NO. 96-08636

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson

APPROPRIATION APPLICATION ACKNOWLEDGEMENT

Re: Water Appropriation Application # 96-08636

The Idaho Department of Water Resources hereby acknowledges receipt of the above referenced Application For Permit To appropriate the Public Waters Of The State Of Idaho. To assist us in providing you with prompt, accurate service, please refer to the above referenced number in all future matters concerning this water right application.

Your appropriation application is currently being prepared for advertising in the county newspaper. This advertisement will be published for two consecutive weeks followed by a waiting period of ten days to allow for the submittal of protests.

If the application is protested during this waiting period, you will be sent a copy of the protest and instructions to aid you in resolving the protest without a hearing. However all protests must be resolved before approval of the application can be made, so if the protestant does not voluntarily withdraw the protest, this department will conduct a conference and/or hearing on the matter.

If the application is not protested it will be forwarded to Boise to be considered for approval by the Director. You will be notified by mail of the Directors decision.

If your application is for groundwater and unless you are using a well that was constructed prior to July 1, 1987, it will be necessary for you to apply for a well drilling permit upon approval of the appropriation application. Well drilling permits can be issued by this office only to holders of approved appropriation permits.

If you have any questions or if I can be of any assistance please feel free to contact me at this office.

Sincerely,

Tom D. King
Sr. Water Resource Agent

- Justification for Excess water use -

Garfield Pony Campground is a public Recreation Area, on the shores of Lake Pemo Creek. It's total land size is 61.0 acres, which 1.5 is used as a lawn - N day use area (picnic & bathroom).

We are asking for 50 Gallons of water per minute (1.1 C.F.S.), to run a proposed landscape irrigation system. This system is designed to water the lawn area with 1 inch. of water per week. (we are being told that a good lawn area needs 1 inch + or - , a week to grow well). Each head will use 5.4 G.P.M. with 7 heads making up one station. Seven stations make up the total system. One run time with this system will be 30 minutes per station, 3 times a week.

If we were to water this area with 0.02 C.F.S., it would take 20 hrs, 3 times a week, also it would take a total of 40 single stations.

It is clear this system can only run at night, because it's used by the public in the day hours.

Re: Water Appropriation Application

Dear Applicant:

The Idaho Department of Water Resources has received your Application For Permit To Appropriate The Public Waters Of The State Of Idaho. However I regret to inform you that the application is not acceptable in its present form, so I am returning it to allow you to clarify or complete the following:

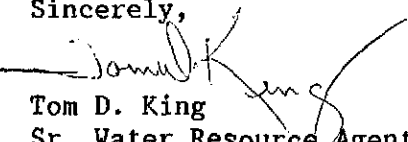

Item #4 and #5: The maximum rate of diversion for irrigation is 0.02 cfs per acre (0.03 cfs per acre if less than five acres are to be irrigated). To seek approval for the excess flow for irrigation purposes, you must complete the enclosed fact sheet for excessive irrigation flows.

Item #4 and #8: By placing an "I" in item #9 you have indicated that there is to be industrial use as well as irrigation. If this is the case, then you must show the rate of diversion and period of use, in item #4. You must also fully describe exactly what is inferred by industrial use.

The Application must be completed and returned to this office with any other information you deem appropriate within 30 days of the above date. Failure to communicate with this office within that time may result in the voiding of your application.

If you have any questions or if I can be of any assistance please feel free to contact me at this office.

Sincerely,

Tom D. King
Sr. Water Resource Agent
