CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The combined rate of diversion under this right and Right No. 96-07685 shall not exceed 0.09 cfs.
6. Domestic use is for 17 homes.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 19TH day of July, 1996.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 96-8512, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before June 1, 19 93.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

Witness my hand this 28 day of JUNE, 1988.

ATHOL ID 83801

RE: Water Right No. 96-08512

Dear Mr. and Mrs. Weiger:

Thank you for calling this morning to discuss the need to amend your water right permit before it can be licensed. It is important to me to see that the water right licenses issued by the Department are accurate.

As we discussed on the phone, we cannot issue a water right license that does not match the permit authorizing the development of the water right. In the case of your permit, No. 96-08512, the field examiner reported that one of the lots served water by your system is in the SW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 27, Township 53 North, Range 4 West. I have highlighted this lot in pink on photocopies of two maps submitted by the field examiner. (Please note that these maps show part of the place of use recommended by the examiner. The place of use will also include four lots along Seasons Road.)

The SW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 27, Township 53 North, Range 4 West, was not listed as part of the proposed place of use on your application for permit. I have enclosed a photocopy of your application with the pertinent parts highlighted in green. In order for the SW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 27, Township 53 North, Range 4 West, to be included when right 96-08512 is licensed, your permit must be amended. The statutory fee for an amendment of permit is \$50.00.

Please carefully review the information I have enclosed. If you agree with the conclusions of the field examiner, please sign the application for amendment and return it with the fee. If you disagree, please send me information supporting your conclusions. If you have any questions, please contact me at 208-327-7946.

Respectfully,

Shelley Walter Keen
Water Rights Supervisor

RE: WATER RIGHT NO. 96-08512

Dear Water Right Holder(s):

The above referenced water right is in the process of being licensed. However, before a license can be issued, your permit must be amended to depict your water right as it has actually been developed.

The enclosed Application for Amendment contains information that will be included on the license when it is issued. The amendment reflects a change in the location of the place(s) of use description. Please review carefully and if you concur, sign the amendment and return with the \$50.00 filing fee within 14 days.

The last page of the Application for Amendment form contains a list of Conditions of Approval and Remarks proposed for the license when it is issued. These conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208) 327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

MEMORANDUM

TO: File 96-08512

FROM: Sharla

DATE: June 24, 1996

RE: Recommendation Adjustment(s)

The final license recommendations for Right 96-08512 are based on the following.

C. DIVERSION AND DELIVERY SYSTEM

2. Place of Use - NESW, NWSW, SWSW, S27, T53N, R4W
NESE, NWSE, SESE, S28, T53N, R4W

H. RECOMMENDATIONS

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Domestic	1/1 - 12/31	0.09 cfs	20.4 afa

After reviewing the engineering plans submitted with the exam, as well as the large scale map used by the examiner to identify the lots receiving water, there are no lots in this category in the SWSE, S28. This ¼¼ will not be shown on the license.

The well used under this permit is the same well for which license 96-07685 was issued. The capacity listed on that license was 0.09 cfs (the license was issued for the entire amount). Although a measurement was not made on that inspection (nor was one made for the exam being reviewed), the field examiner specifically noted that the static water level in the 461 foot well is 419 feet. The well log (which has been copied for this file) shows the discharge at the time of drilling to be 10 gpm and no water is found until hitting 415 feet. With such a lift and operating at even 35 psi (the proof of beneficial use form says 35-60) the capacity listed on the previous license is probably accurate. Their capability of supplying 25 homes rests on the 11,000 gallon storage tank the examiner identified in the previous exam.

The rate of diversion listed on the license to be issued will be 0.09 cfs, as well as the capacity. A condition will be added limiting the combined rate of diversion to this amount under the two rights.

RE: Water Right Permit 96-08512

Dear Mr. Weiger:

We are writing to obtain a set of "as built" engineering plans, or site plans for the water delivery system associated with the above Water Right Permit.

A beneficial use field examination was conducted by Wayne Baldwin of this office on June 15, 1995. His report suggests that plans exist for your system, however, we do not have them with the file.

This information is necessary prior to recommending that this Water Right Permit be Licensed. We will hold this file until we hear from you.

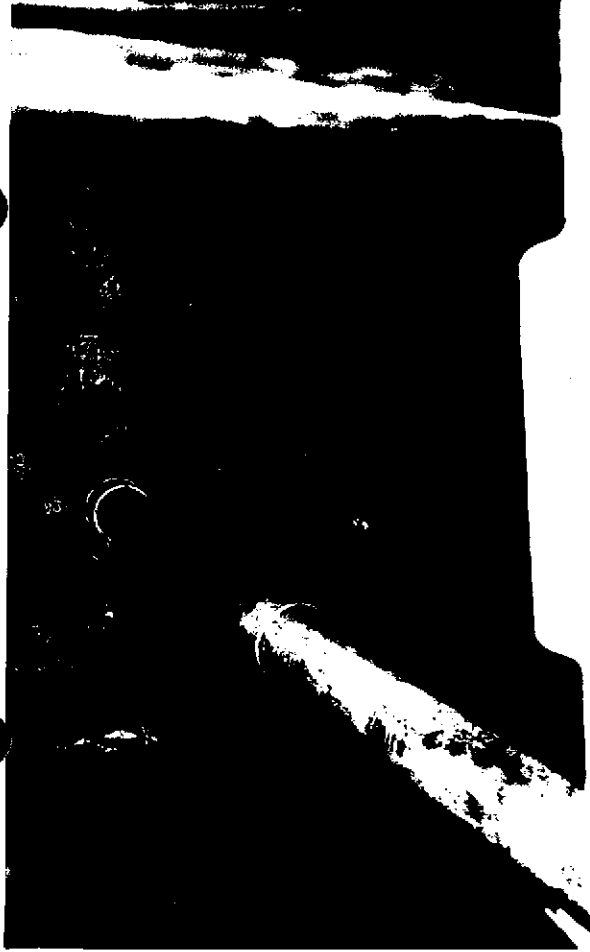

Please contact me at this office if you wish to discuss this issue further.

Sincerely,

Allen Beardslee
Sr. Water Resource Agent

RE: PERMIT NO. 96-08512

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the NORTHERN Regional Office in Coeur D' Alene at (208)769-1450.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 96-08512

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1995.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: PERMIT NO. 96-08512

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct you attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of

RECEIVED

OCT 17 1988

Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

Gary Spackman
Supervisor, Water Allocation Section

Re: 96-8512

Gentlemen:

Enclosed is a copy of a protest filed against the approval of a permit pursuant to the above-referenced application. The Department suggests you contact the protestants directly in an effort to determine the nature of the protest and attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculation?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use conflict with the local public interest?

You will be notified at a later date of the time and place of the conference and/or hearing. If we can be of any assistance, please contact us.

Sincerely,

ROBERT G. HAYNES, P.E.
Regional Manager

Re: 96-8512

Dear Ms. Seerley:

Your protest against the approval of the above-referenced application has been received and a copy has been sent to the applicant. The Department suggests that you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculation?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use conflict with the local public interest?

You will be notified at a later date of the time and place of the conference and/or hearing. If we can be of any assistance, please contact us.

Sincerely,

ROBERT G. HAYNES, P.E.

Athol, Id. 83801

Re: 96-8512

Dear Mrs. Seerley:

According to the departmental records, you have a ground water right for one home, stock and irrigation of two acres, with a priority date of January 19, 1970. This water right is evidenced by License No. 96-7043 and any new development of groundwater in the area is subordinate to this right. In other words, if the pumping of a new well interferes with the pumping of your well, you can legally cause them to stop pumping.

I hope my explanation is satisfactory and meets your needs. If it has, you may wish to withdraw your protest at this time.

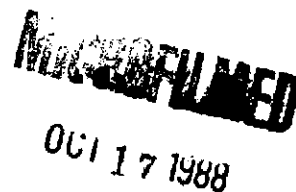

If you do, please do so by May 2, 1988. If you do not withdraw your protest by that time, we will proceed with the protest process.

If you have any questions, please contact me at this office.

Sincerely,

TOM D. KING
Senior Water Resource Agent

R Keith Hegginsaw Rev
Sir.

If this permit application
would affect my well
in any way I'm against
issuing it.

I have previous water
rights legally as my
well was registered some
time ago with you.

It was in the name of
Jordan Seerley who is now
deceased, and is the owner
now, his wife.

I appreciate an explanation
from you.

Sincerely

Leala M Seerley
