RE: PERMIT NOS. 96-8408, 96-8459, & 96-8493

Dear Mr. Larkin:

This correspondence is in follow up to my meeting with Phil Jeppson on August 21, 1990 concerning the field examination conducted on permit 96-8408.

The meeting with Phil was very informative and as a result modifications have been made to the examiner's report that allows additional rate of flow being used by the hatchery. See the attached draft with the modifications.

In addition to permit 96-8408 two other permits also are used by the hatchery. I have taken this opportunity to kill two birds with one stone, Inclosed are two amendment of permit applications for permits 96-8459 and 96-8493. These permits require amendment prior to licensing because the examiner showed that the water could be used in the hatchery building. The legal description location of the building had not originally been included on the permits.

Please review the information provided on the draft and the amendments, if you have any questions feel free to call me at Ph. 327-7947. If everything is satisfactory please sign the amendments and return with the filing fee of \$20.00 for each amendment.

Sincerely,
