Dear Mr. Kassebaum:

In regards to your letter of 3/3/87 concerning why the amount proposed for license on the above referenced permit is 0.07 cfs rather than .10 cfs as shown on the permit, the reason is because the capacity of the motor and pump installed for irrigation cannot produce the 0.10 cfs identified on the permit.

A permit is only a temporary water right and reflects the intent to develop water by the permit holder.

A license is a permanent water right which reflects what was actually developed under the permit.

If you can show that your irrigation system diverts more than 0.07 cfs, please provide us with this information. We will wait another 10 days before any further action is taken on this water right. If we do not hear from you, we will assume your concerns have been satisfied.

Sincerely,

JIM JOHNSON

Dear Mr. Johnson,

In reply to your letter of February 26, 1987,
in re: Permit No. 96-8292.

According to our records shown by the
enclosed copy of "Approved" Application For Permit,
the figures on our water rights are not correct.

I have marked in red on the enclosed
application permit what was approved.

I think those are the figures that should
be on the permit. I fail to come up with any
reason for the change of those figures on the
irrigation water. If you do not use these
figures on the permit, I would like a letter
from you stating the reason for the change.
