RE: WATER RIGHT NO. 96-08246

Dear Mr. Burnett:

Thank you for returning the Application For Amendment (for licensing purposes) form.

I am responding to your question regarding the amount appropriated (.20 cfs) compared to Condition 6 listing .02 cfs. Condition 6 simply refers to the standard amount of .02 cfs (1 miner's inch or 9 gallons per minute) that is allowed per acre for anything above 5 acres (unless a higher amount can be justified).

This is the standard verbiage used on every licensed right over 5 acres. No matter how much your total diversion rate is, you are still limited to a certain amount per acre, which is .02 cfs.

I hope this answers your question. If you have any further questions, please feel free to contact me.

Sincerely,

BRENDA L. CHAPMAN
Water Resource Agent

The amount in the 3 storage facilities (23,000 gallons) would help provide an adequate supply during peak demand times on the system.

RE: Permit No. 96-8246

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code.
