Dear Mr. Hurley:

We acknowledge receipt of your statement of completion of water development use for the above-referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We do not know at this time when he will be able to conduct the examination; however, the examiner will try to contact you at the time he makes the examination so that you may show him the system. If you will not be available to show the system, please provide this office with the name and address of someone who will be able to do so. Your permit will remain valid until the examination is made.

If you have any questions concerning the field examination, please contact this office. Please be sure to use the above-referenced permit number in all future correspondence concerning this examination.

PROOF DUE NOTICE

RE: Permit No. 96-8226

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager

Dear Ms. Hurley:

I am enclosing an Application for Permit with instructions and an Affidavit of Residency.

The application must be filed on any surface water diversion and the affidavit must be filed if you plan to produce power. I am unaware of any other filings or other laws governing power production for personal purposes.

If you need any further assistance, please contact me at this office.

To whom it may concern:

I own 5 acres on a creek in Bonner County. We plan to pump water directly from the creek via a gasoline pump to our house, & to our gardens. Do we need to file a water rights claim to be able to pump water out of the creek? Also, we are thinking of investing in a water powered generator that sets in the creek & produces power. We are not aware of what laws would affect us in our endeavor to produce power for our household out of the creek. Perhaps you can answer this question for ~~me~~ me or direct me to who may.

Thank you,
