Intake is next to Culvert on upper Road. When irrigation is necessary, 2" pvc pipe which is 100' long, is attached and ran through the Lower culvert. A valve & reducer is attached down stream of the culvert. A 30' section of 1/2" pvc carries the water to the garden system which is a buried drip line. A vinyl hose is attached to reach to the fruit trees. Total irrigation is for about 1/2 acre. Elevation difference is about 10 feet.

RE: Permit No. 96-8188

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before July 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.
