PLACE OF USE: DOMESTIC, same as IRRIGATION use

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

Dear Mr. Kiebert:

This is to acknowledge receipt of your letter of July 19, 1982, regarding the application of Mr. Glen Ford, No. 96-8078.

Please be advised that if Mr. Ford's application is to be approved, it will carry a stipulation that it is subject to all prior valid water rights.

I have done some research of our files and am unable to locate a Claim to a Water Right represented by the posted notice filing which you sent to us relating to the use of water on your property.

Please be advised that it is necessary for you to file a claim to a water right with this Department on your use of water. This filing must be made by the 30th of June, 1983, to protect your water right. I am enclosing a Claim to a Water Right form and instructions for your use.

I realize the need to make this filing may raise some questions in your mind since a posted notice claim was made by a prior owner. Please feel free to contact me if I may be of any assistance.

Sincerely,

ROBERT G. HAYNES, P.E.

Dear Sirs

Ford enclosed a prior water right to the waters of Conger Creek. We are the owner of the land covered by this claim. The water has been in continuous use since the original filing. Fished by open ditch then 4" pipe. The water is still being used for irrigation and the operation of a ball mill. A well was developed in 1968 for domestic use because the creek became unsafe for that purpose. due to careless sewage practices upstream.

Most years the granting of the Ford request for irrigation would not affect the supply but in a real dry year it could. Glen Ford 96-8078 if granted should so state that it is subject to my prior claim.

The pressure at point of use is approximately 45 p.s.i. The water is used for irrigation only and the well for home use only.

Please let me know if there is need of further proof-

Yours truly

Harold V. Tiebert
