Dear Mr. Haynes:

We have reviewed the application for water permit by Mr. and Mrs. Nevins of Clark Fork, Idaho. Under normal circumstances, the Forest Service would probably issue a special use permit to the Nevins for a head valve and transmission line to transport the water across National Forest land.

However, in the Nevin's case, they wish to put their development on National Forest land which is now being considered as a part of the Scotchman Peak study area, under RARE II, for inclusion into the Wilderness system. The final decisions have not been made at this time. We, therefore, could not issue a special use permit to the Nevins to transport water across National Forest land until that decision has been made.

Webb Creek does cross the Nevin's property. Possible alternatives would be (1) to keep all improvements on their private property, and (2) delay making application until the Scotchman proposal is complete. My estimate on the time frame for alternative 2 is at least one year.

Gentlemen:

Enclosed is a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to our office along with the publication bill. Your cooperation in this matter is appreciated.

Very truly yours,

ROBERT G. HAYNES, P.E.
District Supervisor

Dear Mr & Mrs Nevins,

Please find enclosed your application for permit and your check #92-58 in the amount of \$10.00.

The Department has considered 0.02 cfs/acre to be adequate water for irrigation purposes. In order to obtain a right for a diversion rate in excess of this, it would be necessary to prove to the satisfaction of the department director that this excessive amount was necessary and would be put to a beneficial use. Using the 0.02 cfs/acre figure, the quantity of water normally recognized as meeting your needs would be 0.30 cfs.

The fee for 0.30 cfs is \$35.00. The fee is on a graduated scale that increases as the quantity of water increases.

If we may be of any further assistance, please do not hesitate to contact us. As soon as you have decided which way to go on this matter, please return the application and appropriate fee to us for further processing.

Sincerely,

BLEA BEITO
Secretary
