Dear Mr. Abbs:

Re: Permit No. 96-7668

Enclosed is a copy of the above-referenced permit along with the statement of beneficial use postcard received in this office on June 29, 1984. Note the discrepancies between the two. On the letter which accompanied the postcard, you state that you previously sent us a postcard and we did receive that postcard. It was, however, for Permit No. 96-7667, stockwater from unnamed springs.

Permit No. 96-7668 is for a domestic use with the source of water as Lewellen Creek. Please review the permit. If the project is complete, return the statement of beneficial use postcard. If the project is not complete and you wish an additional period of time in which to complete the project, return the request for extension of time along with the \$15 filing fee. If you wish to let the permit lapse and become of no further force and effect, no response is necessary. The necessary forms and instructions are enclosed for your convenience.

Please respond to this letter as soon as possible, if a response is necessary, to have the permit reinstated and return the permit to good standing.

If you have any questions concerning this matter, please feel free to contact me at 334-4290.

RE: 96-7668

Dear Mr. and Mrs. Abbs:

Enclosed is a copy of your approved application for the above-referenced permit.

We direct your attention to the conditions of approval as listed on the fourth page, more specifically to the condition requiring you to make provision to obtain a 60-day supply of water without diverting it directly from the creek. This condition is necessary because there is not sufficient unappropriated water in Lewellen Creek to supply you with domestic water during the summer months.

Several possible alternatives are available to you. Among those alternatives are:

1. You may wish to have a well drilled.
2. You may haul water from another source.
3. You may install a storage tank which could hold enough water diverted from the creek at times when water was plentiful to carry you through the dry period.

If you elect to install a storage tank, we suggest that it be of approximately a 10,000-gallon capacity for each household that you intend to serve with your system.

If you have any questions or if we may be of any service, please do not hesitate to contact us.

Sincerely,

Robert G. Haynes
