RE: 96-7639

Gentlemen:

Enclosed is a copy of your approved application for the above-referenced permit.

We direct your attention to the conditions of approval as listed on the fourth page, more specifically to the condition requiring you to make provision to obtain a 60-day supply of water without diverting it directly from the creek. This condition is necessary because there is not sufficient unappropriated water in Lewellen Creek to supply you with domestic water during the summer months.

Several possible alternatives are available to you. Among those alternatives are:

1. You may wish to have a well drilled.
2. You may haul water from another source.
3. You may install a storage tank which could hold enough water diverted from the creek at times when water was plentiful to carry you through the dry period.

If you elect to install a storage tank, we suggest that it be of approximately a 10,000-gallon capacity for each household that you intend to serve with your system.

If you have any questions or if we may be of any service, please do not hesitate to contact us.

Sincerely,

ROBERT G. HAYNES, P.E.
