RE: Water Appropriation Permit 96-9063

Dear Ms. Nelson:

In August of 2001 IDWR issued Permit 96-9063 authorizing you to establish a right to divert 0.04 cfs of water from Mirror Creek for the irrigation of 1.5 acres in Bonner County. In October of 2001 you submitted a Proof of Beneficial Use statement indicating that your project is complete, and on May 15, 2002, an IDWR field inspector confirmed that you are diverting and using water from Mirror Creek for the proposed irrigation use. Normally, the next step in the water appropriation process would be the issuance of a water right license confirming that you have established a water right in accordance with Permit 96-9063. However, a search through existing water right records revealed that a water right license issued in 1982 might already cover some or all of your water use.

Water Right License 96-7503 was issued to Daniel Cline for the diversion of 0.09 cfs from Mirror Creek for domestic and stockwater purposes and for the irrigation of one acre. I have enclosed a copy of License 96-7503 for you to review. Just as with your permit, the authorized point of diversion and the authorized place of use under Right 96-7503 are in the NE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 6, Township 55 North, Range 1 West, B. M. In December of 2002 I spoke with Randy Stenson and others at the Bonner County assessor's office about the ownership history of your 2.2-acre parcel. They told me that your home was built around 1982. They also told me that it appears Daniel Cline owned your parcel until October of 1981. Therefore, it appears that Water Right 96-7503 may have been established on the parcel of land you now own.

Because a water right is appurtenant to the land on which it is used, ownership of a water right usually goes with the ownership of the land unless otherwise stated in the contract of sale or deed. Therefore, you may be entitled to assert ownership of Water Right 96-7503. Ownership of the older right may be important to you because when water diversions are regulated in a time of shortage, senior (older) water rights are filled before junior (newer) water rights. (Section 42-106, *Idaho Code*, says, "As between appropriators, the first in time is first in right.")

If, after looking into this matter, you believe you are the owner of Water Right 96-7503, please complete the enclosed Notice of Change in Water Right Ownership form and return it to IDWR with documentation showing that you do, in fact, own the parcel where Daniel Cline established

the water right. Please also indicate whether the one acre of irrigation authorized under Water Right 96-7503 covers your use, or if a water right license should be issued for the additional half an acre reported by the field examiner for Permit 96-9063. If you do not own Water Right 96-7503, or if you think that Right 96-9063 may have been forfeited through five years of non-use prior to your acquisition of the property, then please notify me in writing so that IDWR can proceed with issuance of a license for the water use under Permit 96-9063.

If I have not received a response from you within 30 days, I will assume you have no interest in Right 96-7503. If you have any questions, please call me at 208-327-7946, or email me at skeen@idwr.state.id.us.
