Dear Mr. Opferman:

We are returning your Application for Permit along with your check #28-73 in the amount of \$10.00, for additional information.

Item #2--If the water in question comes from two different sources, it is required that you file an application for each source. We classify any water that is appropriated by excavation of 18 feet or deeper as a groundwater source. Therefore, if you plan to develop the well and dig deeper than 18 feet, there should be two separate applications submitted. (1 for groundwater and 1 for the spring) We have enclosed another application for your use.

Item #3a--The location for both your well and spring is to be described by, Township, Range, Section, and 40 acre tract. This information can be obtained from your deed or by county maps.

Item #4--Please note that we have increased the amount of water for each use to .03cfs for domestic and .02cfs for stockwater. This will insure you a proper amount to adequately supply your needs.

Item #5--The total will be .05cfs.

Item #6--Describe your means of appropriating the water. (pump, motor, collection box, pipes, ect.)

Item #11--Please indicate by Township, Range, Section, and 40 acre tract, where your points of diversion and place of use will be.

In answer to the question you have asked in the remarks, an application for permit is the correct form to submit and the end result will be a ~~new~~ valid water license which will be recorded by our Department, plus you will receive one for your records.

Please complete the above items and return to our office with the required \$10.00 filing fee for each application and we will proceed with the processing of your applications.

If you should have any questions, please feel free to contact us.

Yours very truly,

Fred Eisenbarth
