WATER RIGHT LICENSE

License of Water Right No. 96-7094 Priority June 21, 1972 Amount 0.09 cfs

THIS IS TO CERTIFY, that Thomas Ordway  
of Cambridge, Massachusetts, has complied with the terms and conditions of Permit  
No. 96-7094 issued pursuant to Application for Permit dated June 21, 1972,  
and has submitted proof to the Department of Water Resources on May 26, 1981,  
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a  
capacity for the diversion of 0.09 cfs of water from an unnamed stream,  
tributary to Three Sisters Creek, and that the permit holder has applied to a beneficial use and  
established a right to use water as follows:

| Beneficial Use         | Period of Use                 | Rate of Diversion | Annual Volume      |
|------------------------|-------------------------------|-------------------|--------------------|
| Domestic (1 Unit)      | from January 1 to December 31 | at 0.04 cfs       | and 1.2 acre feet  |
| Irrigation             | from March 15 to November 15  | at 0.05 cfs       | and 17.5 acre feet |
|                        | from to at cfs and            |                   |                    |
| (both dates inclusive) |                               |                   |                    |

Subject, however, to the condition that no more than 0.09 cfs of water be diverted at any one time, and  
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose  
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed  
18.7 acre feet per year, said waters to be diverted within the (2 points) SE $\frac{1}{4}$ NW $\frac{1}{4}$

Dear Mr. McDevitt:

One of the conditions of approval of your water Permit No. 96-7094 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. McDevitt:

When we first received your application for permit, recreation was not listed as a proposed beneficial use under Item #4. It was not until later, when you were in our office, that recreation was added. At that time, the application was already advertised without listing recreation as a beneficial use. Section 42-211 of the Idaho Code states:

"If an amendment is made after publication of notice of the original application, said notice shall be republished following amendment, upon payment by the applicant, of the statutory fee for republication."

Therefore, if you wish to have recreational purposes included under this application, it will be required that we re-advertise the application, and it is also required that we receive the statutory fee of \$10 for the re-advertising.

If you should decide to exclude recreational purposes, it will in no way affect the priority or total amount of water for the application. You do have fish propagation listed, which may cover the purpose of including recreation.

We would appreciate a reply concerning your decision as soon as possible. If you should have any questions, please do not hesitate to contact us.

Also, when we first submitted the application "recreational purposes" was listed. This appears to be your error. Why, then, are we required to pay the \$1000?

Dear Mr. Eisenbarth:

The above application for appropriation of state waters from a tributary to Three Sisters Creek is of concern to us primarily regarding the use of domestic water from the stream.

We recommend that the intended appropriation for domestic supply be done under the auspices of the environmentalist from the Panhandle Health District at Sandpoint, Robert Camp.

As far as the dam construction is concerned, we require that a minimum of stream disruption be involved and that it is done under the recommendations by your office and the Fish and Game Department in the area.

Dear Mr. McDevitt:

Your application has been receipted by our department. However, before we can begin processing the application, we will need to have an amount for power and fish propagation.

The fees received limit the maximum amount of water you may divert to 1.0 c.f.s. That is, you have applied for 0.14 c.f.s. for domestic purposes, 0.1 c.f.s. for irrigation, and listed the total as 0.24 c.f.s. You may claim 1.0 c.f.s. for power and 1.0 c.f.s. for fish propagation and the same as listed for domestic and irrigation and change the total amount to 1.0 c.f.s. The total applied for does not have to equal the column added, but may not exceed the largest quantity applied for.

Therefore, if you feel that 1.0 c.f.s. is not enough water for power or fish propagation, you will need to send us additional fees. Either way, we will need a letter from you stating the amount of diversion rate for fish propagation and power so we may change your application, officially receive it, and start processing it.

After July 5, 1972, please mail all correspondence to Department of Water Administration, 401 Front Avenue, Room 210, Coeur d'Alene, Idaho, 83814.

Dear Mr. McDevitt:

We are returning your Application for Permit for clarification of several items. We have taken the liberty of typing your application for your convenience.

Under item No. 2 you have listed the source of water as "unnamed". Is the source of water from an unnamed stream or an unnamed spring? Please note that we have listed each use intended under item No. 4 and have decreased the amount of water requested for domestic to 0.14 cfs and for irrigation to 0.10 cfs. The maximum quantity our department can approve for irrigation purposes is 0.02 cfs per irrigated acre unless you can justify the need for more. Under item 8b you have listed a total of 5 acres, and there according to Idaho Code, the maximum we can approve is 0.1 cfs unless we receive a justification for more. Also, the usual amount we approve for a domestic purpose is 0.02 cfs per house. If you intend to furnish seven individual houses, 0.14 cfs would adequately supply the need. We have listed power and fish propagation under item No. 4 and have left the amount open for your decision. You should only list that amount that is necessary to adequately supply the purpose. We have enclosed an "Affidavit to Establish Residence" form which we require for power purposes.

Please review all items on our typed application and make any changes you deem appropriate, and sign once again at the bottom of page 3. Before we can accept your application, we will need to receive the required fee. A fee schedule is located in the instructions.

If you should have any questions, please feel free to contact us.
