Dear Mr. Brunner:

One of the conditions of approval of your water Permit No. 96-7062 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before August 1, 1972. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

O Dear Mr. Nagel:

We are returning the applications for permit that you have submitted in the behalf of Mr. Roy G. Magnus and Mr. Roman A. Brunner. We find in reviewing these two applications that there are several questions that need clarification before we could process them.

P The application of Mr. Roy G. Magnus should have the following corrections:

Item #3a, which lists the point of diversion, does not appear to correspond with the map on page three of the application.

Y Item #4 should list a specific quantity for each nature of use. We would assume from reviewing the application that stock water should also be included under item #4. Under normal conditions, the Department could approve only one inch, or 0.02 cubic feet per second per single domestic unit. If the water system of Mr. Magnus supplied only one family, then the quantity requested for domestic use under item #4 would appear to be somewhat excessive.

Item #8a,1 should list the place of use for your stock watering and domestic needs as to the nearest 40 acre subdivision, section, township and range that each use would lie within.

We also wish to advise you that the signature on page three of the application must appear in the exact manner as it does under item #1, page one of the application.

96-7062

Herbert Nagel

- 2 -

June 1, 1971

The application of Mr. Roman A. Brunner will require the following information:

Item #2 should list the source of water supply, which we would assume to be ground water.

Item #4 should list a specific quantity for each use. We find in further reviewing this application, that you may also wish to include stock watering as a nature of use under item #4.

Item #8a,1 should include the 40 acre subdivision, section, township and range that each use will incur within.

Each of these applications must be submitted with an appropriate filing fee, which may be determined from the enclosed fee schedule. We are also enclosing two new application for permit forms, with instructions for your use in this matter, should you choose to use them.

Very truly yours,

Dorian Clay
