Dear Mr Kresge,

Before your permit to appropriate groundwater can be licensed, an examination of the water system must be conducted by an agent of this department. Since the pumphouse has been locked during my last two visits, it will be necessary for someone to be present during the examination to allow access to the measuring device. The system will have to be in operation at the time of the examination.

Please contact this office to make an appointment for this examination.

William A. Greene

Ridgefield, Washington 98642

Dear Mr. Greene:

This is in reply to your letter of November 14, 1966. I have checked over the records again and we find that the information we gave you previously is the only recorded right. This license was issued to a Mr. Charles Crockett with a priority date of April 2, 1908. The points of diversion were NE 1/4 Sec. 12 and NE 1/4 Sec. 1 all in Township 54 North, Range 4 West, B.M. This water is to be issued on 320 acres in Section 1 and Section 12, since the original right was for 320 inches of water each acre would then be entitled to one inch.

The license number is 3348 and the other number is 1581. This is the page it was filed on. So they are one and the same. It is possible that the other right for Lots 3 and 4 of Section 1 is recorded in a County Record book and we do not have any record of this. Our water book one, water right 144 has been cancelled and it was for land in Lemhi County.

Sorry we could not locate any other rights for your property.

Very truly yours,

M. RUSSELL BOSCH

Dear Mr. Greene:

A check of our water permits have been made and the only recorded water right is in a license, page number 1581, for the NE1/4NW1/4, Aection 1, which is the same as Lot 3, Section 1. No other rights for the other ground are filed. This right is for 1" per acre.

We are enclosing an application for permit with the instructions for filing on the un-named stream in Section 36.

Very truly yours,

License of Water Right No. 96-7034 Priority June 10, 1969 Amount 0.04 cfs

THIS IS TO CERTIFY, that Allen Chantry
of Wellington, Utah, has complied with the terms and conditions of Permit
No. 96-7034 issued pursuant to Application for Permit dated June 10, 1969,
and has submitted proof to the Department of Water Resources on June 14, 1974,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of .04 cfs of water from a groundwater source,
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume

Dear Mr. Greene,

Thank you for returning our letter along with the information that you no longer own the property.

In Idaho, a water right permit is considered personal property and can only be acquired when the permit holder assigns all or part of his interest, right and title in the permit to another party.

Mr. Allan Chantry has been in touch with our office in regards to your permit. Mr. Chantry is apparently the present property owner for which your permit is for.

Therefore, I suggest that you sign the enclosed assignment form in front of a Notary Public and return it to our office. This form would then convey your interest in the permit to Mr. Chantry. If you have any questions, please contact me at 334-4123.

In reviewing the above referenced permit, I find the following:

Permit No. 96-7295 - RLC Investment, Inc., is the current permit holder. On April 11, 1983, our office received a letter from RLC Investment, Inc. stating that you are the present owner of the property. As of this date, our office has sent a letter to RLC Investment, Inc. requesting an assignment of permit.

Permit No. 96-7034 - William Greene is the current permit holder. On March 14, 1983, our office sent a letter to William Greene in regards to amending the permit before a license could be issued. On March 21, 1983, the above letter was returned marked "Moved, not forwardable".

In Idaho, a permit is considered personal property and can be acquired when the permit holder assigns all or part of his interest in the permit to another party. In your case, both permits are in someone else's name. I believe RLC Investment, Inc. will assign Permit No. 96-7295 to you. However, a problem arises with Permit No. 96-7034.

I have enclosed an assignment form and suggest that you have it filled out and signed by William Greene for Permit 96-7034. If for some reason William Greene cannot be located, our office can accept a sale contract of the land to you by William Greene whereby the contract states the permit by number. If an assignment cannot be obtained then Permit No. 96-7034 could be cancelled.

If you have any questions, please contact me at 334-4123.

Sincerely,

ROBYN CARLSON
Chief Clerk

Dear Mr Kresge,

Before your permit to appropriate groundwater can be licensed, an examination of the water system must be conducted by an agent of this department. Since the pumphouse has been locked during my last two visits, it will be necessary for someone to be present during the examination to allow access to the measuring device. The system will have to be in operation at the time of the examination.

Please contact this office to make an appointment for this examination.

Re: License No. 96-2019
Permit Nos. 96-7034, 96-7084, 96-7295, 96-7296, 96-7367

Dear Mrs. Reader:

I have completed my investigation of the above-referenced Permits and would like to inform you of my findings. I have also enclosed a Waterusers Handbook, a Mandatory Claims brochure and instructions for filing both a Claim and an Application for Permit.

On the permit of Joel W. Baylink (96-7084), I found one single family domestic use with greenhouse and irrigation of approximately one acre of garden and fruit trees. I have recommended that a license be issued to this effect. A license is prima facia evidence of a water right and the last step this Department takes unless otherwise ordered by the District Court.

On the permits previously owned by Glenn Kresge (96-7034 and 96-7295), I found that neither of the wells described by the permits have ever been used for irrigation. However, both have been used for single family domestic purposes and in addition, Permit No. 96-7295 (the permit for the well now belonging to Alan Chantry) has been used for stockwater. Since neither permit was approved for domestic purposes, I will recommend that an Application for Amendment be filed to include domestic uses. The Boise Office will contact you regarding the amendment. You may not wish to file the amendment, since a groundwater right can be developed by the diversion of groundwater and application of that water to the beneficial use of a single family dwelling. This right can be developed without filing with this Department.

During my investigation, I could find no valid permit nor license for irrigation of Section 36, T55N, R4W, by means of surface water. Charles Crockett, a previous owner of the property, was issued License No. 96-2019 for surface water irrigation within Sections 1 and 12, T54N, R4W. A transfer of the lands irrigated was never filed with this Department, so this license now belongs to the owners of the formerly irrigated acreage within Sections 1 and 12. However, if the land described in this license has not been irrigated for a period of five consecutive years, this license might be forfeit.

Mrs. Wilma Reader
Page Two
February 23, 1981

Mr. Greene made application for permits to appropriate the subject surface water and Permit Nos. 96-7296 and 96-7367 were approved and issued. He or Mr. Kresge apparently irrigated the property under these permits but allowed the permits to lapse through failure to prove beneficial use. Mr. Greene or Mr. Kresge could have proven beneficial use in one of the following ways:

1. By having a registered professional engineer inspect the system, measure the rate of diversion and file a certified statement of his findings with this office, or;
2. By filing a statement of beneficial use with this Department. The Department would then perform the examination as I have on Permit Nos. 96-7034, 96-7084 and 96-7295.

It is not possible to prove beneficial use on these two permits, since the time limit on both expired over six months ago.

I hope this information will help you in future sales and that it clears up the questions you had concerning the difference between a water right and a permit to appropriate public water. If you have any future questions or need of my services, please don't hesitate to contact me at this office.

Sincerely,

TOM D. KING

Dear Sir:

In reference to "Water Right by Point of Diversion" WRD430, page 1835 dated 2/4/82.

We talked to Mr. King from the Department of Water Resources in Coeur d'Alene and he suggested us writing for the Examiners Report and correspondence relating to examination of Sec-36 Tract-NWNE Right #-96-7295 dated 1974 also Sec-36 Tract-SWNW Right #-96-7034 dated 1969.

We are the owners of property, and would like copies of requested information in order, to determine our water rights.

Your promptness in this matter would be greatly appreciated.

Dear Mr. Greene:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

We note that in reviewing this proof affidavit you indicate that you will install a measuring device as required by the conditions of approval of your permit. This measuring device must be installed by the time our examiner makes the exam, or your water rights cannot be confirmed by the issuance of a license. We are enclosing a list of the types of measuring devices approved by this office.

If you have any questions concerning the field exam, please contact our Northern District Office at 401 Front Ave., Room 209, Coeur d'Alene, Idaho.

This is to acknowledge receipt of your certified letter of May 1, 1974 concerning my water permit #96-7034 and the requested proof of beneficial use prior to July 1, 1974.

I am not currently a resident on my north Idaho farm and I have not been since the water permit was issued as the farm was under lease to a tenant for a period of approximately 10 years. The lease has now been terminated, and I will henceforth play an active management role. My current work as a Washington State School Superintendent makes it difficult for me to consummate the required proof of beneficial use prior to July 1, 1974; hence I respectfully request a 90 day extension so that I may provide you with the necessary documents after I have had an opportunity to visit my property in north Idaho and contact your Coeur D Alene office.

Dear Mr. Greene:

One of the conditions of approval of your water Permit No. 96-7034 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before July 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Green:

===== We are again returning your copy of the application. =====

It is essential to your application that you fill out blank 5-b on page 2. We have partially filled out this blank for you. If you will write it in ink and put the irrigated acres in the proper subdivision, and the total number of acres, we will be able to process your permit. I have marked on your application the subdivisions which need the amount of acres to be irrigated in each subdivision.

Please fill in blank 9, which asks who the owner of the property is at the point of diversion. Also, 9-b, who the owner is at the place of use.

If there are any questions please contact us. The sooner we receive this information the sooner we will be able to process your application.

Dear Mr. McEldowney:

Please find enclosed herewith the executed Application for Permit To Appropriate the Public Waters of the State of Idaho as per the instructions contained in your letter of April 9, 1969. I am also enclosing my personal check in the amount of \$10.00 for the filing fee.

Your attention is called to the August 29, 1966 and the November 16, 1966 letters of your Mr. M. Russell Bosch. I am enclosing photostats of Mr. Bosch's letters for your information and to alert you to the fact that I am not applying for any additional water right for lots 3 and 4 of section 1, township 54 north range IV west, B. M.

If you have any questions relative to either this letter or the application, please advise.

Sincerely,

William A. Greene
Superintendent

Dear Mr. Greene:

This is in reply to your letter of November 14, 1966. I have checked over the records again and we find that the information we gave you previously is the only recorded right. This license was issued to a Mr. Charles Crocket with a priority date of April 2, 1908. The points of diversion were NE 1/4, Section 12 and NE 1/4, Section 1 all in Township 54 North, Range 4 West, B.M. This water is to be issued on 320 acres in Section 1 and Section 12, since the original right was for 320 inches of water each acre would then be entitled to one inch.

The license number is 3348 and the other number is 1581. This is the page it was filed on. So they are one and the same. It is possible that the other right for Lots 3 and 4 of Section 1 is recorded in a County Record book and we do not have any record of this. Our water book one, water right 144 has been cancelled and it was for land in Lemhi County.

Sorry we could not locate any other rights for your property.

Very truly yours,

M. RUSSELL BOSCH
Office Manager

A check of our water permits have been made and the only recorded water right is in a license, page number 1581, for the NE 1/4, Section 1, which is the same as Lot 3, Section 1. No other rights for the other ground are filed. This right is for 1" per acre.

We are enclosing an application for permit with the instructions for filing on the unnamed stream in Section 35.

Very truly yours,

M. RUSSELL BOSCH

Gentlemen:

It has been brought to our attention that on or about
July 12, 1968, you had a well drilled.
The well is reported to be located at a point in the
(Bonner County) all, Sec. 36, T. 55N, R.
4W, B.M. for unlisted use.

A search of our records has failed to find your application or approved permit. Under existing Idaho Statutes, Sections 42-226, 42-229, and 42-230 of the Idaho Code, you are required to file and obtain an approved permit before you divert waters from a subterranean source, with the exception of domestic wells which are defined under Section 42-111 of the Idaho Code.

If we have overlooked your permit, please advise the Department as to your permit number. However, if you have not yet filled out an application for permit, please use the instructions and the blank application form which we have enclosed.

We will be very happy to assist you with any questions you may have.

Very truly yours,
