APPLICATION FOR PERMIT

To Construct a Reservoir and Appropriate and Store
The Public Waters of the State of IdahoClark & Dawson
Sagle, IdahoApplication No. R 30084
Permit No. R 878

96-2321

1. Name of Applicant: ART HULQUIST and Clark (M. E.) & DAWSON (7/11/11) (Lester M.)

Postoffice address: Laclede

County Bonner

State Idaho

I. If applicant is a corporation, give:

(a) Date and place of incorporation:

(b) Amount of Capital Stock: \$

(c) Amount paid in: \$

(d) Names and addresses of directors:

II. The financial resources of the corporation are:

(a) Cash on hand: \$

(b) Treasury Stock: \$

(c) Bonds to be issued: \$

(d) Other resources:

2. Quantity of water to be stored: Seventy (70)

acre feet per annum.

3. Source of water supply is Tanner Creek (Creek) (River) (Spring), a tributary of Pend Oreille River.

4. The outlet of the proposed reservoir is located N. 17° 30' E. 2780 feet, distant from the S. E. corner of Section 5, Township 55 N., Range 3 W., B. M. and is in the NW ¼ of SW ¼ of Section 4, Township 55 N., Range 3 W., B. M. County of Bonner

5. Fill out either (a) or (b).

(a) The reservoir is located in the channel of Tanner Creek (Creek) (River).

(b) The reservoir is to be filled through a feeder canal, the point of diversion for which is located (bearing) feet distant from the corner of Section, Township, Range, B. M., and is in the ¼ of ¼ of Section, Township, Range, B. M.; width at bottom feet, width at top feet, depth of water feet; average grade per mile feet; Capacity cubic feet per second.

6. (a) The area of the high water line of the reservoir is 35

acres.

(b) The reservoir capacity is 70

acre feet.

"Remarks"

7. Height of reservoir dam 2.5 feet, length at top 16 feet, length at bottom 6 feet, size of outlet 6 feet by feet. The dam is to be constructed of materials as follows: Concrete and clay

(If height will exceed 10 feet, plans must be approved by Department of Reclamation, before beginning construction.)

8. (a) Will water stored in reservoir be diverted to canal or aqueduct, thence to land to be irrigated without commingling with natural flow of

Tanner Creek (Creek) (River)? No

(b) Water stored in reservoir will be carried in the channel of Tanner Creek (Creek) (River), a distance of one mile to point of diversion located 2500 feet, distant from the S W corner of Section 33, Township 56 N., Range 3 W., B. M., and in the NE ¼ of SW ¼ of Section 33, Township 56 N., Range 3 W. B. M.

9. (a) Area of watershed above dam site Two (2)

square miles

(b) Estimated maximum flow of stream 50

cubic feet per second.

10. Water is to be used for Irrigation

purposes.

11. If for mining, milling, power or manufacturing purposes give:

(a) Point of use of water (bearing) feet, distant from Corner of Section, Township, Range, B. M. and is in the ¼ of ¼ of Section, Township, Range, B. M.

(b) Amount of power generated:

H. P., under

feet head.

(c) Water is to be returned to

(Creek) (River) (Spring) at a point (bearing) feet

distant from the corner of Section, Township, Range, B. M. in the ¼ of ¼ of Section, Township, Range, B. M.

Remarks

12. Water stored in accordance with this Permit will be carried to place of use through a canal heretofore constructed under the terms of Permit No. 21665, which is hereby referred to and made a part hereof.

13. Kind of diversion works: Ditch and pipe

(Dam, canal, flume, pipe, etc.)

14. Height of diversion dam: feet, length at top

feet, length at bottom

feet. The dam is to be constructed

of materials as follows:

(If height will exceed 10 feet, plans must be approved by Department of Reclamation, before beginning construction.)

15. Size of headgate: Width feet, Height feet.
16. Diversion Canal: Width at bottom feet, width at water line feet, depth of water feet, Dimensions of Flume feet.
- Diameter of Pipe inches; Length of Conduit miles. Average grade per mile feet.
17. Estimated cost of Works: Storage Works: \$ 250.00 Diversion Works: \$
18. Time required for completion of work One (1) years.
19. Time required for complete application of water to proposed beneficial use is Five (5) years.
20. The land to be irrigated is described in the following tabulation:

(Give Irrigable acreage in each 40-acre subdivision.)

Twp.	Range	Sec.	NE $\frac{1}{4}$				NW $\frac{1}{4}$				SW $\frac{1}{4}$				SE $\frac{1}{4}$				Totals
			NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	
56 N.	3 W.	33							10	10									20
55 N.	3 W.	4							4	2	1	7							14

Total Number of Acres to be Irrigated

34

21. Existing rights and/or valid permits appurtenant to lands described in Sec. 20 are Permit No. 21665

Remarks: No. 6-b: If reservoir capacity covers natural storage above dam storage the capacity would be about 770 acre ft.
The dam itself would only increase the storage about 70 acre feet.
No. 12: 14 acres will be irrigated by pump directly from the lake.
No. 7: We will use flash boards for the gate and place them late in the runoff; just soon enough to get a fill.

BE IT KNOWN That the undersigned hereby makes application for permit to construct a reservoir and appropriate and store the public waters of Idaho as herein set forth, and that the enclosed map is hereby made a part of this application.

Re: Water License No. R-878

Mr. Millard E. Clark
Sagle, Idaho

Dear Mr. Clark:

I do not believe it would be legally proper to amend Water License No. R-878 in the somewhat informal manner you suggest.

In the first place, Art Hulquist and Clark (M. E.) and Dawson (Paul) are the record owners of this license just as you are likely the owner of land which stands in your name.

If there is to be a partial change in the ownership of the water license, the record owners, you, Art Hulquist and Paul Dawson should all join in signing the assignment of whatever portion of the license is to be conveyed to L. M. or Lester M. Dawson, however you wish the amended license to show the current owners.

Upon the receipt of such an assignment, it can be recorded on the license. Recording fee is fifty cents, which should accompany the assignment.

Very truly yours,

A handwritten signature in cursive script, appearing to read "Geo. N. Carter".

~~4" x 30"~~

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Re: Permit # R-878

Mr. Millard E. Clark
Rt. # 1
Sagle, Idaho

Dear Mr. Clark:

Statutes requires a field inspection in connection with the proofs on Permit # R-878 before license and certificate of water right can be issued.

Such inspection and report on same is required for any and all permits being brought to license within this State.

An inspecting Engineer from this Department requests that you or someone familiar with the terms of the permit and representing you be prepared to accompany him on the inspection, on Friday, May 30th,

in the morning.

If he cannot get in touch with you by phone or otherwise he will drive to the well location or point of diversion given in the permit.

Very truly yours,

MARK R. KULP
State Reclamation Engineer
By

E. N. Humphrey
E. N. Humphrey
Deputy.

March 31, 1958

Re: Permit No. R-878

Mr. Carl Hulquist
Sagle, Idaho

Dear Mr. Hulquist:

This is in reply to your letter of March 24, 1958.

Your Permit No. R-878 is a record of your right to appropriate and use water. As long as you abide by the terms of the permit and mature same to license it is a valid record of your right.

If Mr. Donahue's diversion is cutting down the supply to which you have a legal right, you should advise him of such and request that sufficient be permitted to flow to fill your right.

If he continues to divert water and cuts down the supply to which you are entitled it will be necessary for you to take steps through an attorney to protect your right.

Now regarding inspection of his dam, if possible, please give the legal location of his dam and the name of the lake or reservoir. Also give us more information regarding the dam. Tell us about how much the dam raises the water and how many acres the reservoir covers.

I will be in North Idaho probably within two months to inspect in connection with your permit which is ready to be licensed. At that time I can also investigate regarding your complaint, and make inspection of his dam.

I will not go to the time and expense of making a trip North any sooner than that unless you feel there is very imminent danger of flood and disaster from failure of his dam.

Will you please let me hear from you again regarding this at your earliest convenience.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

RECEIVED
MAR 25 1958

Department of Reclamation

I am writing this letter to protest my neighbor Tom Donahue is changing the course of the water that feeds Jewel Lake to another watershed.

It will severely curtail our irrigation supply of water on which we have permit No. R-878.

Am concerned about construction of dams he has installed at outlet of lake. They are small-earth dams unsafe for water storage. Which will endanger my dwelling & property which lies below.

Would sincerely appreciate your cooperation in seeing that they at least are built to specifications to make them safe.

Sincerely

Carl Gulquist
Sagle Idaho.

Re: Permit No. R-878

Mr. Millard E. Clark
Rt. # 1,
Sagle, Idaho

Dear Mr. Clark:

We acknowledge receipt of the Deposition of Holder and two witnesses, also affidavit of publication in the Sandpoint News Bulletin, all submitted in proof of application of water to beneficial use on Permit No. R-878.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

We enclose the statement of costs from the Sandpoint News Bulletin, which you may require for your files.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Gentlemen:

This acknowledges receipt of Notice of proof of application of water to beneficial use under Permit No. R-878, to be made at Sandpoint at 10:AM. September 16th, 1957, before Phyllis Porath, Notary.

As of this date, we have mailed the Notice to the Sandpoint News-Bulletin with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof and to then mail the affidavit of publication and statement of costs to you.

At. 10:AM. September 16th, at Sandpoint, you and two disinterested witnesses, who are familiar with the terms of the permit and the work done thereunder, must appear before Phyllis Porath, Notary Public to execute the enclosed depositions.

When returning the depositions to this office please, be sure to include the affidavit of publication.

Very truly yours,

LEGALS

NOTICE FOR PUBLICATION NOTICE OF PROOF APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10 A. M. on the 16th day of September, 1957, at Sandpoint, County of Bonner, State of Idaho, before Phyllis Pratt, Notary Public, proof will be submitted of the application to beneficial use of appropriate and store seventy (70) acre feet per annum of the waters of Tanner Creek in accordance with the terms and conditions of Permit No. R-878 heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are Art Hulquist and Clark & Dawson, Route 1, Sagle, Idaho.

The use to which said water has been applied is Irrigation.

The amount applied to beneficial use is storage of (70) Seventy Acre Feet per annum.

The place where said water is used is $S\frac{1}{2}$ NW $\frac{1}{4}$ Section 33, TWP 56N., Range 3 W. B. M. and $S\frac{1}{2}$ NW $\frac{1}{4}$ and N $\frac{1}{2}$ SW $\frac{1}{4}$ Section 4, TWP 55 N., Range 3, W. B. M.

The right to take water from such works is based upon Permit No. R-878.

The source of supply from which such water is diverted is Tanner Creek.

The date of priority which said user is prepared to establish is September 6, 1957.

MARK R. KULP

State Reclamation Engineer.

Permit No. R 878

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Millard E. Clark R#1 Sagle, Idaho Farming P. O. Address R#1 Sagle, Idaho

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Art Hulquist and Clark & Dawson

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. No. R-878 August 23, 1951 → 9-6-51

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Jewell Lake and Tanner Creek Sub?

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. Concrete Dam 70 Acre Feet

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation by overhead sprinkler S²NW⁴ Sec. 33, 56N. - 3W.
S²NW⁴, N²SW, Sec. 4, 55N. - 3W.

R-878

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. None

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. 70 acre feet

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. Same as original application

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Full 70 acre feet used since 1952 for storage for sprinkler irrigation

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. None

Reclamation Engineer:—

Dear Sir:—

RECEIVED
JUL 26 1952
Department of Reclamation

In answer to your letter of July 18.
am inclosing Map No. R 878 which gives you
most of the answers you want. I thought
you had a map like this, And also a drawing
of the dam.

It really isn't a dam, just fillers of concret
on each side of the creek sit feet apart tied
together with a concret slab imbedded in the
creek at creek bed level. The fillers and slab
have a groove in them to hold planks. or flash
boards. up to $2\frac{1}{2}$ ft. high. We used just two
8 in. planks this year as we thought that would
hold all the water we would need. R-878
over

There is no millway, the water flows
over the dam and on down the creek. The
creek channel is narrow and very deep at least
20 feet. There is no danger to any one or any
thing from any excess flow of water.

The name and location of lake is as follows.

~~Lower~~ Jewell Lake

On the E $\frac{1}{2}$ of S. E $\frac{1}{4}$ Sec 5 and N. W $\frac{1}{4}$ of S. W $\frac{1}{4}$ Sec 4 Township 55. R. 3 W.

Would like very much to have you see this

this project and give me your ideas on enlarging
on a future time when you are in this
part of Idaho.

Would like the map returned with your

reply.

RE: Permit No. R-878

Mr. Millard K. Clark
Segle
Idaho

Dear Mr. Clark:

We have your proof of completion of works in connection with Permit No. R-878, together with your check for the \$5.00 fee.

From the description given, it appears that this storage is storage on the top of a natural lake. If this is so, we should have the name and legal location of the lake in connection with this proof.

The information seems to be incomplete regarding the outlet works to the dam you have built. Is there a headgate in the dam? If so, give the dimensions and specifications of same; or is there a solid dam with a headgate in the ditch that controls the water level?

There is no mention of a spillway or any means of carrying the water over the dam and down the stream with safety in case of excessive amounts of water.

We will not issue Certificate of Completion of Works in connection with your permit until we have heard from you again.

Very truly yours,

MARK R. KULP

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Art Hulquist &
Clark & Dawson
C/o M. E. Dawson
Sagle, Idaho

Boise, Idaho July 1, 1952

Dear Sir:-
s:

Under the terms of your Permit ~~No 878~~.....you are required to complete your diversion works on or before.....September 6, 1952..... I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP

State Reclamation Engineer

**NOTICE FOR PUBLIC
NOTICE OF PROOF APPLICATION OF
WATER TO BENEFICIAL USE**

Notice is hereby given that at 10 A. M. on the 16th day of September, 1957, at Sandpoint, County of Bonner, State of Idaho, before Phyllis Porath, Notary Public, proof will be submitted of the application to beneficial use of appropriate and store seventy (70) acre feet per annum of the waters of Tanner Creek in accordance with the terms and conditions of Permit No. R-878 heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are Art Hulquist and Clark & Dawson, Route 1, Sagle, Idaho.

The use to which said water has been applied is Irrigation.

The amount applied to beneficial use is storage of (70) Seventy Acre Feet per annum.

The place where said water is used S $\frac{1}{2}$ NW $\frac{1}{4}$ Section 33, TWP 56N., Range 3 W. B. M. and S $\frac{1}{2}$ NW $\frac{1}{4}$ and N $\frac{1}{2}$ SW $\frac{1}{4}$, Section 4, TWP 55 N., Range 3, W. B. M.

The right to take water from such works is based upon Permit No. R-878.

The source of supply from which such water is diverted is Tanner Creek.

The date of priority which said user is prepared to establish is September 6, 1957

Mr Kelp,

Have filled out this application The best I no how. If it isn't O.K. send it back with directions and will try to correct it.

Would like to do this work be for it gets cold this fall if we can.

am inclosing check of \$5.00 for filing fee. Hope this is enough.

We need the forms to fill out for a use permit. Would you send them.

Thanks for your trouble.

August 2, 1951

Messrs. Clark & Dawson
Sagle, Idaho

Gentlemen:

At the request of Mr. Edwin O. Nurmi, Work Unit Conservationist of the Soil Conservation Service of Sandpoint, we are enclosing herewith a Reservoir Permit to store water in Jewel Lake.

Mr. Nurmi as requested that we also send an application to Mr. Art Hulquist of Laclede, Idaho.

We would suggest that instead of filing separate applications on the storage waters of Jewel Lake, that you and Mr. Hulquist get together on a joint filing, which in our opinion would be more satisfactory to this Department and to yourselves.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Department of Reclamation

Mr. Mark Kulp
Reclamation Engineer
State of Idaho
Boise, Idaho

Dear Mr. Kulp:

Please inform Messrs Clark & Dawson, Sagle, Idaho, as to the necessary forms that they need to fill out in order that they are permitted to do the following:

1. Pump water from Jewel Lake (the lake's surface area is about 35 acres) into the dry outlet channel to supplement their irrigation water during the dry season. They now have a use permit to irrigate in section 33 - T56N - R3W, but the water supply is not adequate this time of the year. The maximum rate of pumping would be 200 gallons per minute from July 15 to September 15. Jewel Lake is about 22 feet deep throughout most of the lake area. It is in sections 4 and 5 - T55N - R3W.
2. Build a control dam, not to exceed 2 feet in height, at the outlet of Jewel Lake to maintain extra storage for irrigation during July, August and September. This would be a concrete structure with the same channel cross-section as present, but it would be made so that flashboards could be inserted after the main spring run-off has passed, to maintain a higher lake level for extra water storage. The land around the lake is owned by Mr. Art Hulquist, Laclede, Idaho.

Mr. Hulquist is in favor of the dam and would assist Clark & Dawson in building it. Mr. Hulquist also intends to use the water for sprinkler irrigation and desires the proper forms from your office to make an application for a water right.

Sincerely yours,

Edwin O. Nurmi
