Re: Permit No. G-31789

Arthur S. Evans
Route 1
Sagle, Idaho

Dear Mr. Evans:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department, stating that you have been issued a permit and are now submitting proof of beneficial use. Previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply it upon request at any time.

Dear Mr. Evans:

One of the conditions of the approval of your permit
G-31789 was that proof of application of the water to
beneficial use be submitted to this office on or before
March 27, 1969.

Enclosed is an affidavit form which must be used to submit
this proof. You may request an extension of time provided the
delay is for reasonable cause as indicated in Section 42-204, ICA.

Either the proof or a request for extension must be received
by this department on or before the above mentioned date, otherwise
the permit will lapse and be of no further force or effect.

42-238 LOGS OF WELL DRILLERS

42-238. LOGS OF WELL DRILLERS.—The business and activity of opening and excavating wells is hereby declared to be a business and activity affecting the public interest in the ground water resources of the state, and in order to enable a survey of the extent thereof every well driller is hereby required to keep a log of each well that may hereafter be excavated or opened by him in Idaho including wells excepted under Sections 42-227 and 42-228, Idaho Code, and to furnish a copy of such log, duly signed, to the state reclamation engineer within thirty days following the completion of such well. Said logs shall become a permanent record in the office of the state reclamation engineer for geological analysis and research and be there available for public inspection. Said logs shall be upon forms furnished by the state reclamation engineer and shall show:

- (a) The location of the well with reference to legal subdivisions;
- (b) The kind and nature of material in each stratum penetrated, and each change of formation with at least one entry for each ten foot vertical interval, and the time required to penetrate such interval;
- (c) The name and address of the well driller and date of commencing drilling and date completed;
- (d) The size and depth of the well and location of water bearing aquifers;
- (e) The size and type of casing and where placed in the well including number and location of perforations;
- (f) The flow in cubic feet per second or gallons per minute if flowing well, and the shut in pressure in pounds per square inch;
- (g) The static water level with reference to the land surface, and the drawdown with respect to the amount of water pumped per minute, when a pump test is made;
- (h) The temperature of waters encountered, and other information as may be requested by the state reclamation engineer;
- (i) As part of said log the well driller upon request of the state reclamation engineer shall furnish samples of each change of formation below the surface, and containers and cartage therefor shall be furnished by state reclamation engineer.

Every well driller before lawful drilling of a well for development of water, shall, from and after July 1, 1953, under penalty of misdemeanor for failure to so comply obtain a license from the state reclamation engineer which shall be issued by and in the form prescribed by the said state reclamation engineer upon payment of \$10.00 license fee, which license expires each year on June 30th, and is renewable by payment of a \$5.00 renewal fee. Said licenses are not transferrable and may be revoked or renewal refused by said reclamation engineer if it appears that the requirements of this section have not been complied with. Revocation or refusal to renew a well driller's license shall be determined by said state reclamation engineer only after fifteen days' notice setting forth reasons therefor, has been sent by registered mail to the licensed well driller.

TO ALL PERMIT HOLDERS:

Well logs are an important part of your recorded water right and State Statutes require that well drillers supply logs on all wells, whether irrigation, domestic, drain or stock wells, to be filed in the Department of Reclamation. In view of the rapidly increasing demand for ground water, the lowering of the ground water level, and the creation of critical ground water areas, it is important that you, as owner, make sure a log on your well is filed in this office. See Idaho Code 42-238.

Very truly yours,

CARL E. TAPPAN
