License of Water Right No. 26197/96-2243 Priority Jan. 16, 1963 Amount 0.95 cfs

THIS IS TO CERTIFY, that PAUL I. GABRIEL
of Clark Fork, Idaho, has complied with the terms and conditions of Permit
No. 26197/96-2243 issued pursuant to Application for Permit dated February 9, 1956,
and has submitted proof to the Department of Water Administration on February 8, 1971,
(late proof)
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.95 cfs of water from Webb Canyon Stream,
tributary to Cascade Creek, and that the permit holder has applied to a beneficial use &
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume

REMARKS: The water comes from land owned by Government and the point of diversion is on same.
The water sinks anywhere from about 100 ft. downstream from point of diversion to 3800 ft. downstream where it springs out, depending on amount of water in stream. During higher water it runs above ground all the way.
The pipe line ascends from 100' per mile rate to about 2500 feet rate at point of diversion.
There is about 1000 feet of main line that is permanent, the balance will be moved as needed to irrigate the land, "of the kind of crops", requiring water.

Dear Mr. Gabriel:

Pursuant to your letter of November 12th we are forwarding a copy of your water license No. 26197/96-2243 which was issued on April 2, 1974. Our file indicates that a copy was mailed to you on April 4, 1974, which you evidently never received.

This license could not have been amended to include stockwater as it would have constituted an enlargement of the permitted right. Therefore, we are enclosing an application for permit for your use in filing on water for stockwatering purposes.

If you have questions regarding the filing procedures of the enclosed application, it may be more convenient for you to contact our Northern District Office at 401 Front Avenue, Room 209, Coeur d'Alene, Idaho.

Sincerely,

Dear Mr. Gabriel:

A representative of this Department has made an examination of the works covered by your Permit No. 26197/96-2243 and has found the following:

Quantity of water diverted: 0.95 cfs Source: Webb Canyon Stream

Amount of water that can be recognized as beneficially used under Idaho law: 0.95 cfs

The maximum quantity diverted shall not exceed 225 acre feet per year.

Beneficial use: For irrigation of 75 acres within the NE 1/4, N 1/2 SE 1/4, Sec. 25, Twp. 56 N, Rge. 2 E

Point of diversion: NW 1/4 NW 1/4, Sec. 30, Twp. 56 N, Rge. 3 E, B.M.

Priority date established: January 16, 1963

If you do not concur with these findings, please advise us within 10 days; otherwise, a license will be issued as set forth in this letter.

Clark Fork, Idaho 83811

Dear Mr. Gabriel:

We acknowledge receipt of your affidavit submitted as proof of beneficial use of water. Enclosed you will find an Order which advances your priority under this permit to January 16, 1963.

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof of beneficial use.

The enclosed order modifies the above referenced permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a newspaper as prescribed by the Department. If you will complete the enclosed form and return it to this office, we will cause the notice to be published.

If you have any questions or if we may be of further assistance, please advise.

Dear Mr. Gabriel:

It appearing to the Department of Water Administration that the terms and conditions of Permit 26197/96-2243 to appropriate the public waters of the State of Idaho have not been complied with as to failure to submit proof of beneficial use of water due on February 29, 1964,

you are hereby notified that under the provisions of Section 42-311, Idaho Code, as amended, said permit is hereby held for cancellation, and you are required to show cause before the Director of the Department of Water Administration on or before February 8, 1971, why said permit should not be cancelled.

Permit 26197/96-2243 claims the use of 1.0 cubic feet per second of water, the point of diversion was to be located within the NW¹/₄ NW¹/₄, Sec. 30, T. 56N, R. 3E, B.M. and the permit was approved February 29, 1956.

Dear Mr. Gabriel:

We received your note on the above numbered permit, in regard to determining the amount of water that is used.

We would recommend that you fill out the enclosed forms and proceed with the advertising on this permit, as you lose priority time the number of days you are late on making proof. If the water has been put to beneficial use, that is all that is necessary to make proof. You could go ahead with the amount of 1.0 cubic feet per second, as shown on the permit, as after the proofs have been made our field engineer makes an inspection of the works and determines the amount of water you will be licensed for.

We again enclose the Forms 10 and 11, which should be used, if you have made beneficial use of the water.

Re: Permit No. 26197

Date:

Dec. 2, 1963

Paul I. Gabriel
Clark Fork, Idaho

Dear Mr. Gabriel:

Under the terms of your Permit No. 26197 you are required to make proofs of completion of works and application of water to beneficial use on or before Feb. 29, 1964.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper in the county.

We enclose Form 36-A in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point of points of diversion and the location of use or lands which are irrigated - - by legal description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 36-A.

At the time we send the notice to the newspaper we will send you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set and at the place named, before the Notary Public as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by the field inspection to have been irrigated at the time of proof.

Mr. Paul I. Gabriel

Dear Sir:-

Under the terms of your permit No. 26197 you are required to complete your diversion works on or before March 1, 1958. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Dear Mr. Gabriel:

We are in receipt of your Application for Permit to appropriate the public waters of the State of Idaho to the amount of 1 cubic foot per second from Webb Canyon Creek.

The Application is in due form and will be approved by this Department.

In your letter accompanying said Permit you request to know if you could apply for water on the same Permit to be used as a Reservoir for a log pond.

We wish to state that if you wish to file on a Reservoir for impounding logs it will be necessary for you to make a separate filing for this purpose.

Forms can be furnished you upon request, if you wish to file at this time. Kindly let us know by return mail if you wish us to go ahead with the processing of your Permit which we are holding filed on for irrigation purposes.
