Re: Permit No. 24507

Date: July 31, 1964

Dear Mr. Krebs:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 24507 is due not later than **October 6, 1964**. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date, the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated -- by legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public, as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by field inspection to have been irrigated at the time of proof.

Carl E. Tappan

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Alfred R. Krebs
Route #1

Boise, Idaho

Dear Sir:-

Under the terms of your permit No. 24507 you are required to complete you diversion works on or before October 6, 1958. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Dear Mr. Krebs:

We have your letter of September 18, referred to us by the Bureau of Reclamation, which inquired as to water rights on Lots 2 & 3 SE NW and SW NE Section 3, Township 58 North, Range 1 East, B.M.

The water rights on record in this department are indexed by source and by the name of the appropriator and not by land description. However, we have looked up our record of filings on Grouse Creek, and while we find some permits for use on other portions of Section 3, Township 58 North, Range 1 East, we find none appurtenant to the land you describe.

We enclose a form of application for permit together with a pamphlet giving regulations and instructions in regard to filing same which you may use if you wish to apply for a water right.

When this application is approved, it will be signed by the proper State Officials and sent you as a use permit under which you may proceed with the construction of the work described in the application. In order to complete your water right, two proofs are required as follows:

First, proof of Completion of Works which is made by affidavit before a Notary Public. The time required for making this proof should be stated under question 12 in the application.

The final proof is made when the water has been completely applied for irrigation or whatever purpose it is intended. Notice of such proof must be published for four consecutive weeks in a county newspaper at your expense, and at the time set for proof, depositions are to be executed by yourself and two witnesses in proof of such beneficial use. The additional time required for making this proof should be stated under question 13 of the application.
