APPLICATION FOR AMENDMENT
TO PERMIT TO APPROPRIATE THE PUBLIC WATERS
OF THE STATE OF IDAHO, NO. 23056

RECEIVED
JAN 7 1958

Department of Reclamation

Comes now GEORGE E. JOLLEY and represents to the State
Reclamation Engineer of the State of Idaho:

That he is the owner and holder of Permit to appropriate the Public
Waters of the State of Idaho, No. 23056.

That the points of diversion ^{are} described in said permit as being located
in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ and SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 12, Township 5 North, Range 4 West B.M..

That he now requests that the point of diversion be changed to a point
located in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 12, Township 55 North, Range 4 West, B.M.

That his reasons for desiring to make such change are as follows:

*one reason is that I only have to have one transformer & it is cheaper
& another reason I do not have to change the main line to irrigate from
one side of road to the other & that save lots of labor.*

That no one will be injured by such change, and that such change will be
made at Permit Holder's own risk.

Signed at Idaho, this 4 day of Jan, 1958

Gentlemen:

Mr. Seufert of R#1 Priest River, Idaho has asked that the records be re-checked regarding water rights filed on the SW $\frac{1}{4}$ of Sec. 14, Twp. 55 N., Range 4 WBM. The rights would have been filed by George E. Jolley in about 1962 or 1963 according to Mr. Seufert. He has farmed this place for years and says the rights were checked by the Reclamation engineer the same time as rights for Roy McClure were checked. Mr. McClure has land in Sections 11, 12 and 14, Twp. 55 North Range 4 WBM and advises that he has water rights.

Mr. Seufert advises that Mr. Jolley also owns Section 12 and 13, Twp. 55 N., Range 4 WBM on which there should be water rights.

Any additional information you can give us would be appreciated.

Dear Mr. Jolley:

Our field engineer's report on his inspection of the application of water to beneficial use under the terms of Permit No. 23056 shows the pump & sprinklers ~~are~~ capable of conveying 62 miner's inches, or 1.24 c.f.s. of water for the irrigation of 120 acres.

Upon receipt of the statutory fee of \$ 12.00 -based at the rate of \$2.00 for each 40-acre subdivision - we will issue the License and Certificate of Water Right, confirming the right with priority of September 11, 1952 to the use of 1.24 second feet of surface water with the point of diversion in the SW¹/₄SE¹/₄, Sec. 12 from Hoodoo Drainage Ditch for irrigation of 120 acres in the SE¹/₄SW¹/₄, N¹/₂SE¹/₄, SW¹/₄SE¹/₄, Sec. 12; NW¹/₄NE¹/₄, NE¹/₄NW¹/₄, Sec. 13, T. 55 N., R. 4 W., B.M.

Dear Mr. Jolley:

We received your letter of September 25th in regard to above noted permits.

No extension of time can be allowed under Permit No. 23183 as the full time allowable was given on the permit.

You may make proof of beneficial use of the water at any time however if the proof is later than the due date, as shown on the permit, the date of priority will be advanced the same length of time. If the proof is made exactly one year late, the priority will be advanced just one year to October 25, 1953.

You should review land description. Enclosed is pencil sketch with a few notations.

Very truly yours,

Dear Mr. Jolley:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Sandpoint News-Bulletin, all submitted in proof of completion of works ~~and beneficial use on Permit No. 23056.~~

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Dear

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 23056 is due not later than Sept. 23, 1963. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

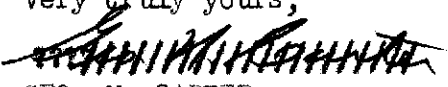

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date, the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated - by legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set and at the place named, before the Notary Public, as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by field inspection to have been irrigated at the time of proof.

That he now requests that the point of diversion be changed to a point
located in the SW 1/4 of Section 12, Township 55 North, Range 4 West, B.M.

That his reasons for desiring to make such change are as follows:

*one reason is that I only have to have one Transformer & it is cheaper
& another reason I do not have to change the main line to irrigate from
one side of road to the other & that saves lots of labor.*

That no one will be injured by such change, and that such change will be
made at Permit Holder's own risk.

APPROVAL OF STATE RECLAMATION ENGINEER

I, Mark R. Kulp, State Reclamation Engineer of the State of Idaho, hereby
approve the above and foregoing application for amendment to Permit to appropriate
the Public Water of the State of Idaho, No. 23056. This approval constitutes
a new permit and is issued as an amendment to the original permit, to which it re-
fers and of which it becomes a part, and said application is approved only insofar
as the rights of others will not be adversely affected thereby.

Dear Mr. Jolley:

In your proof of completion of works under Permit No. 23056, you say that you wish the points of diversion as described in the original permit to be changed to just one point which is located in the SW¹/₄SE¹/₄ of Section 12, Township 55 North, Range 4 West, B.M. We have enclosed an application for amendment for this purpose. Please complete, sign, and return it. We will hold issuance of your Certificate of Completion of Works pending receipt of this application.

Also, you said that you would like a six year extension of time for application of water to beneficial use. It is impossible that this extension be granted under Permit No. 23056, however, you may file application for another permit. To explain: Permit No. 23056 was approved September 23, 1952 and the terms, in accordance with the statute are five years for completion of work or to September 23, 1957, and six additional years for completion of beneficial use or until September 23, 1963.

Dear Mr. Jolley:

For some reason we cannot find your Completion of Works Proof which you sent to this office on Form 6, in connection with the above stated permit.

In our letter of November 14, 1957, we wrote you acknowledging receipt of your Proof of Completion of Works and requested that you send in your five dollar fee for Completion of Works. Since we have not been able to locate your Completion of Works Proof sent to this office and since you have not sent in the five dollar fee, we are enclosing herewith another Form 6, Completion of Works Proof, and will request that you fill out same and mail to this office together with your check for five dollars.

We regret requesting you to fill out another Proof, however, we have searched high and low for said Proof and we cannot find same here in this office. We thought probably that we inadvertently sent the Proof back to you in our letter of November 14th.

Spokane, Washington

Dear Mr. Jolley:

On November 14, 1957 this department wrote you a letter requesting the correct land description of the lands which you were making Completion of Works Proof on, in connection with the above stated Permit No. 23056. At the same time we requested that you send in your fee of five dollars for Completion of Works Proof. We cannot find your Proof of Completion of Works Form 6, furnished by this department and we think we must have inadvertently sent the proofs back to you with our letter of November 14th.

We assume, since you did not answer our letter in which we enclosed a slip showing the land description and the number of acres irrigated under each 40 acre subdivision, that this land list must have been correct. However, if we did return to you your Proof of Completion of Works, we wish that you would forward same to us right away.

We wish to acknowledge receipt of your Proof of Completion of Works on Permit No. 23182⁵ enclosing your check for the five dollar filing fee. This Proof is in due form and after the same is recorded here in this department, you will hear from us regarding same.

Dear Mr. Jolly:

This will acknowledge receipt of Proof of Completion of Works in connection with the above permit.

We are still somewhat confused over the land description as stated in the Completion of Works. We are enclosing a slip upon which is designated the location of the lands as stated in the permit.

In checking over the tax receipt which we are returning herewith, with what information we have in this department, we think perhaps the location as stated herewith is correct. We wish that you would check same and if the same is correct or nearly so, that you would let us know and we will attach the same slip to the Completion of Works Proof.

You also overlooked submitting a five dollar fee for Completion of Works Proof along with your Proof. Upon receipt of the five dollar fee and your statement as to land location, we will issue Certificate of Completion of Works.

It appearing to the State Reclamation Engineer that the terms and conditions of Permit No. 23056
to appropriate the Public Waters of the State of Idaho, have not been complied with as to

Completion of Works Proof which was due September 23, 1957

you are hereby notified in compliance with Sec. 42-311, Idaho code that said Permit No. 23056
is hereby held for cancellation.

You are hereby required to show cause before the State Reclamation Engineer on or before forty days from
date of this notice why said Permit should not be cancelled.

Said Permit No. 23056 claims the use of 4.3 cubic feet per second of the
waters of Hoodoo Drainage Ditch with point of diversion located

Mr. George E. Jolley

Dear Sir:-

Under the terms of your permit No. 23056 you are required to complete your diversion works on or before September 23, 1957. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Dear Mr. Jolley:

In reply to your letter of August 4th, we enclose a form of application for permit to appropriate the public water of the State of Idaho, together with a pamphlet giving regulations and instructions in regard to filing same.

Since this is from the Hoodoo Drainage Ditch, your application should be accompanied by written permission from the officers of that company to file on same.

When your permit application is approved, it will be signed by the proper State officials and sent to you as a use permit, under which you may proceed with the construction of the works described; but in order to complete the water right two proofs are required.

First, proof of completion of works, which is made by affidavit before a Notary Public. Second, proof of beneficial use, when the water has been completely applied for the purpose for which it is intended. Notice of such proof must be published for four consecutive weeks, at your expense, in a county newspaper, before making the proof, and at the time set for proof depositions are to be executed by yourself and two witnesses before the Notary Public named in the notice.

The time required for making these proofs should be stated in Questions 12 and 13 of the application.

Very truly yours,

MARK R. KULP
