=====

The final licensing recommendations for the above referenced water right are based on the information below:

I. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Stockwater	1-01 to 12-31	.02	1.4

The stockwater rate has been reduced to the permit limit of .02 cfs. Even though the permit limit was for 25 head of mixed stock, the deletion of the irrigation use allows an increase in the number of stock without exceeding what the volume limits would be.

Additionally, they said that our legal description is not descriptive enough to pinpoint the owner of the property described on the Application for Permit.

Dear Mr. and Mrs. West:

In July of 1990, a representative of our Department contacted you to arrange for a field inspection of your water delivery system identified in the above referenced permit. At that time, you informed the examiner that no development was made and stock drink directly from the springs.

Because no development has been made, the Department must clear its records of this right. I have enclosed a relinquishment form which needs to be signed and returned to our office. No water right is required for in-stream stockwatering.

If we do not receive the relinquishment form within 14 days, the Department will proceed with action to void the permit based on no development.

PROOF DUE NOTICE

RE: Permit No. 98-7452

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK

Dear Mr. and Mrs. West:

A review of your above-referenced Application for Permit reveals that you have applied for 0.05 cfs of water (Approx. 22.5 gpm) for 25 head of stock.

The Department feels that this amount is excessive for the intended use and we will take steps to reduce the amount to 0.02 cfs (Approx. 9 gpm) unless you can prove to the Director's satisfaction that the excess water is needed.

If we do not hear from you within fifteen days, we shall reduce your amount of water to the normal amount for 25 head of stock which is 0.02 cfs.

If you have any questions, please contact us.
