System Description (continued)

3. At the base of a 4 foot X 8 foot natural water fall, a plastic apron has been installed to form a pool. In this pool an 8 inch gravity flow PVC pipe has been placed to collect water and convey it to a two foot X Two foot screened catch basin. The water is conveyed from this catch basin by a 6 inch gravity flow line a distance of 500 feet where it is reduced to a 3 inch PVC gravity flow line to a valve box. From the valve box a one and a half inch gravity flow line delivers water to three sprinklers and three hose bibs with vinyl hoses. From the valve box a three inch gravity flow line delivers water to 12 sprinklers, and a ditch which supplies water to stock and a one and a half inch PVC reduced to a 3/4 inch vinyl hose. This three inch line is deliberately put together in such a fashion that each joint (excluding the joints where a sprinkler is installed) produces a spray of about four gal/min. From the valve box a one and a half inch gravity flow line delivers water to a stock tank and a 3/4 inch hose.

W. Farnsworth, Rt. 1, Bonners Ferry, ID 83805

Dear Tom:

Mr. Farnsworth called me on March 26, 1990, and asked that I inquire about the status of permit no. 98-7108, which authorized development of 0.64 cfs for irrigation and domestic purposes. The file shows that I wrote you and Bob Haynes on October 7, 1988, requesting that you contact Farnsworth about findings of your field examination. The state office also returned your field examination to you in January, 1989.

Will you please contact Mr. Farnsworth in the early part of the upcoming irrigation season, and resolve any disputes over the amount of water being diverted?

Sincerely,

I received the original of the attached letter from Al Farnsworth, contesting the amount that Tom found in the field when he examined Farnsworth's diversion.

Farnsworth is requesting that examiners speak with him about the findings of the exam~~in~~. He stated to me on the telephone that the water was measured during the low flow period of the year, and that in normal years early in the summer the full 0.64 cfs can be diverted.

Dear Mr. Spackman,

Reference my telecon on 23 Sept about your letter of September 15 concerning my water right permit No. 98-07108. I appreciated your knowledgable and helpful comments.

As discussed I believe my system will deliver the full 0.64 cubic feet per second as approved. The amount should not be reduced. The stream flow varies with the seasons, of course, but during the critical watering time of early summer it easily exceeds my 0.64 CFS.

If possible and feasible I would like to review this with an examiner prior to licencing. I will be available any time after October 15 when I return from elk hunting.

Thank you for your consideration in this matter.

Sincerely,

Al W. Farnsworth

RE: PERMIT NO. 98-07108

Dear Permit Holder(s):

The above referenced water right is in the process of being licensed. However, before a license can be issued, your permit must be amended to correspond with the findings of the Department's field examiner.

The enclosed application for amendment contains information that will be included on the license when it is issued. Please review carefully and if you concur, sign the amendment and return with the \$20.00 filing fee within 30 days.

If you do not concur with these findings or if you have any questions, please contact us within the 30-day period.

Sincerely,

Dear Wateruser:

The enclosed Order removes the measuring device requirement as a condition of approval from your permit.

If you have installed the measuring device, the field examination can be more expediently conducted by the Department's field examiner as well as you will derive benefit from water management information which may be obtained from the installed meter.

If you have questions regarding this matter, please contact this office or our regional offices.

Dear Mr. Farnsworth:

One of the conditions of approval of your water Permit No. 98-7108 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before June 1, 1979. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise, the permit will lapse and be of no further force or effect.

MEMO

TO: FILE
FROM: Fred Eisenbarth ~~FP~~
DATE: June 17, 1974
SUBJECT: Protest against Application No. 98-7108 - Al W. Farnsworth

On June 14, 1974, a conference was held at the Boundary County Courthouse with both the applicant and protestant present. Bob Fleenor and myself held the hearing.

The main issue involved was that prior water rights held by Mr. Holdeman, the protestant, No. 98-2108, would be injured by any further appropriation of water from Dobson Creek. During dry parts of the years, there is not enough water for his irrigational needs. The applicant, Mr. Farnsworth, understands and agreed that during these times, he would not use water and that he would allow Mr. Holdeman access to his property at any time to inspect Mr. Farnsworth's point of diversion. Mr. Farnsworth also agreed to install a measuring device and that his diversion dam would not be more than two feet in height.

The protestant then withdrew his protest based upon the above criteria (see withdrawal).

98 7108

1, ~~Laurence~~ Holdeman, hereby withdraw my protest against application for permit no 98-7108 if it is conditioned as follows:

1. Subject to all prior water rights and specifically those of the protestant ~~Laurence~~ Holdeman, no 98-2108.
2. So that the protestant or his assigns or heir have the right of access to and inspection of the point of diversion.
3. The diversion dam shall not exceed a height of two feet.
4. A measuring device of a type approved by the department shall be installed as a part of the diverting works.

Signed this 14th day of June 1974 at Bonners Ferry, Idaho.

NOTICE OF CONFERENCE
AND/OR HEARING

On March 26, 1974, Al W. Farnsworth filed with the Department of Water Administration an application to appropriate the public waters of the State of Idaho. On April 8, 1974, the Department received a protest against approval of said application from Lawrence Holdeman.

The Department has set the matter of protest for conference and/or hearing for Friday, June 14, 1974, at 9:00 a.m., in the Commissioner's Room of the Boundary County Courthouse, Bonners Ferry, Idaho. Any hearing will be held in accordance with the Rules and Regulations of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Administration. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

Failure to appear at the time and place set for hearing by the applicant or protestant may allow the Department without prejudice to dismiss the protest or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Dear Mr. Farnsworth:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 98-7108. You should be aware that the following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department cannot allow a permit for irrigation purposes which would entail the use of more than a continuous flow of 0.02 cubic feet per second of water for each acre of land, or an annual amount of 5 acre feet for each acre of land, unless the applicant can show that more is required. (Section 42-202, Idaho Code)

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the applicant through action outside of the water right proceedings.

Dear Mr. Holdeman:

This is to acknowledge receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

Dear Sirs.

Am writing in regards to the notice in the Bonners Ferry Herald of Application for Water Permit Application No. ~~98-7108~~ 98-7108 water, to come from Dobson Creek. We own the former Ray Gibbons place Part Unit 27 in W $\frac{1}{2}$ Sect. 33 Twn. 62 R2E. Water License No. 30454/98-2108 Priority April 9/62. Amount 0.66 cu. ft. second. Water to come from Dobson Creek. We have ordered an irrigation system to be delivered this spring for about \$6,000.00 so we plan on using this water from now on. Ray Gibbons told us that there wasn't hardly enough water for them when it got dry in the summer time. A few times they did run out in the evening of a hot day. We would not want to deprive any one of water for domestic use tho (0.04) sounds plenty big for just one house. When it comes to irrigating the only time there would be enough for them would be (so wet) when they didn't need it. The last year Gibbons' irrigated was in 1970 so this License is still in affect.

Too we dont like the sound of diversion dam and ditches which could soak away and evaporate more water then they use, but dam enough to get the water to run down or into their pipe sounds good to us.

Sincerely yours.

Laurence Holdeman
